EN: 230

Amendment 1

Proposal for a decision

Recital 6

Text proposed by the Commission

(6) The Specific Programme's actions should be used to address market failures or sub-optimal investment situations, ***in a proportionate manner, without*** duplicating or crowding out private financing ***and have a clear European added value.***

Amendment

(6) The Specific Programme's actions should be used to ***reinforce, widen and extend the excellence of the Union's scientific and technological base, tackle major global challenges, increase the Union's industrial leadership as well as*** address market failures or sub-optimal investment situations ***avoiding*** duplicating or crowding out private financing.

Or. en

Amendment 2

Proposal for a decision

Recital 7

Text proposed by the Commission

(7) Reflecting the important contribution that research and innovation should make to address challenges in food, agriculture, rural development and the bioeconomy, and to seize the corresponding research and innovation opportunities in close synergy with Common Agricultural Policy, relevant actions under the Specific Programme will be supported ***with EUR 10 billion for the*** cluster 'Food and Natural Resources' for the period 2021-2027.

Amendment

(7) Reflecting the important contribution that research and innovation should make to address challenges in food, agriculture, rural development and the bioeconomy, and to seize the corresponding research and innovation opportunities in close synergy with Common Agricultural Policy, relevant actions under the Specific Programme will be supported ***in a dedicated*** cluster 'Food and Natural Resources' for the period 2021-2027.

Or. en

Amendment 3

Proposal for a decision

Recital 7 a (new)

(7 a) Cultural and creative industries are being considered amongst the most innovative companies; they are vital for ensuring linguistic and cultural diversity, pluralism and the offer of innovative and high-quality services and they do trigger innovative spill overs in other industrial sectors, such as tourism, retail, and digital technologies. Cultural Heritage is an integral part of European Cohesion and has the potential to build bridges between tradition and innovation. Preserving the heritage and developing creative solutions in particular in the field of digitalization shall be a priority of the research programme. Horizon Europe will invest at least EUR 500 million into research activities in this field, including EUR 100 million shall be invested in the creation of a “Cultural Heritage Cloud”,

Or. en

Amendment 4

Proposal for a decision Recital 8

Text proposed by the Commission

(8) The completion of the Digital Single Market and the growing opportunities from the convergence of digital and physical technologies requires a stepping up of investments. Horizon Europe will contribute to these efforts with **a substantial increase of** spending in main digital research and innovation activities compared to the Research and Innovation Framework Programme Horizon 2020⁶. This should ensure that Europe remains at the forefront of global research and innovation in the digital field.

Amendment

(8) The completion of the Digital Single Market and the growing opportunities from the convergence of digital and physical technologies requires a stepping up of investments. Horizon Europe will contribute to these efforts with **at least EUR 16 billion** spending in main digital research and innovation activities compared to the Research and Innovation Framework Programme Horizon 2020⁶. This should ensure that Europe remains at the forefront of global research and innovation in the digital field.

⁶ The Communication from the Commission "A new, modern Multiannual Financial Framework for a European Union that deliver efficiently on its priorities post-2020" identifies EUR 13 billion spent in main digital activities under the Research and Innovation Framework Programme Horizon 2020 (<https://eur-lex.europa.eu/legal-content/en/ALL/?uri=CELEX%3A52018DC0098>).

⁶ The Communication from the Commission "A new, modern Multiannual Financial Framework for a European Union that deliver efficiently on its priorities post-2020" identifies EUR 13 billion spent in main digital activities under the Research and Innovation Framework Programme Horizon 2020 (<https://eur-lex.europa.eu/legal-content/en/ALL/?uri=CELEX%3A52018DC0098>).

Or. en

Amendment 5

Proposal for a decision Recital 9

Text proposed by the Commission

(9) ***The types of financing and the methods of implementation*** under this Decision shall be chosen on the basis of their ability to achieve the specific objectives of the actions and to deliver results, taking into account, in particular, the costs of controls, the administrative burden, and the expected risk of non-compliance. For grants, this shall include consideration of the use of lump sums, flat rates and scales of unit costs.

Amendment

(9) ***Grants will be the main type of financing*** under this Decision. ***Other types of financing*** shall be chosen on the basis of their ability to achieve the specific objectives of the actions and to deliver results, taking into account, in particular, the costs of controls, the administrative burden, and the expected risk of non-compliance. For grants, this shall include consideration of the use of lump sums, flat rates and scales of unit costs.

Proposal for a decision

Article 4 – paragraph 1

Text proposed by the Commission

1. In accordance with Article 9(1) of Regulation ... FP/RfP Regulation, the financial envelope for the implementation of the Specific Programme for the period 2021 to 2027 shall be EUR **94 100 000 000** *in current* prices.

Amendment

1. In accordance with Article 9(1) of Regulation ... FP/RfP Regulation, the financial envelope for the implementation of the Specific Programme for the period 2021 to 2027 shall be EUR **120 000 000 000** *in constant* prices.

Or. en

Amendment 16

Proposal for a decision

Article 5 – paragraph 1 – introductory part

Text proposed by the Commission

1. For each mission, a mission board may be established. It shall be composed of around 15 high level individuals including relevant end-users' representatives. The mission board shall advise **upon** the following:

Amendment

1. For each mission, a mission board may be established **for co-designing and steering implementation**. It shall be composed of around 15 high level individuals including relevant end-users' representatives. The mission board shall **include, among others, academia, research and technology organisations, all-sized industry, territorial authorities,**

relevant end-users' representatives. The members of the mission board shall be appointed by the Commission, following an independent and transparent procedure for their identification, including an open call for expressions of interest. They shall advise on the following:

Or. en

Justification

To increase the impact of missions, the missions board should include the key R&I actors, including territorial authorities for better synergies with regional funds.

Amendment 17

Proposal for a decision

Article 5 – paragraph 1 – point a

Text proposed by the Commission

Amendment

5. The activities of the ERC shall support research carried out across all fields by individual and transnational teams in competition at the European level.

5. The activities of the ERC shall support research carried out across all fields by individual and transnational teams in competition at the European level. ***To improve the impact of the successful ERC proof of concept, the scheme will be open to non ERC grantees if they complying with all eligibility criteria.***

Or. en

Amendment 21

Proposal for a decision Article 6 – paragraph 5 a (new)

Text proposed by the Commission

Amendment

5 a. *A Seal of Excellence shall be awarded to a beneficiary of the ERC proof of concept if the proposal was eligible, has passed applicable thresholds and was not able to be funded under the specific call*

for proposals.

Or. en

Justification

The Seal of Excellence should be extended to the ERC proof of concept.

Amendment 22

**Proposal for a decision
Article 7 – paragraph 4**

Text proposed by the Commission

4. The Scientific Council shall act exclusively in the interest of achieving the ERC, according to the principles set out in Article 6. It shall act with integrity and probity and carry out its work efficiently and with the greatest possible transparency.

Amendment

4. The Scientific Council shall act exclusively in the interest of achieving the ERC, according to the principles set out in Article 6. It shall act with **complete independence**, integrity and probity and carry out its work efficiently and with the greatest possible transparency.

Or. en

Justification

The ERC Scientific Council must keep its independence and be “the guarantor of the quality of the activity from the scientific perspective.”

Amendment 23

**Proposal for a decision
Article 9 – paragraph 1**

Text proposed by the Commission

1. The Commission shall establish a European Innovation Council (EIC) for implementing actions under Pillar III 'Open Innovation' which relate to the EIC. The EIC shall operate according to the following principles: focus on breakthrough and disruptive innovation, autonomy, ability to take risk, efficiency, effectiveness, transparency and

Amendment

1. The Commission shall establish a European Innovation Council (EIC) for implementing actions under Pillar III 'Open Innovation' which relate to the EIC. The EIC shall operate according to the following principles: focus on **new ideas, which could lead to** breakthrough and disruptive innovation, autonomy, ability to take risk, efficiency, effectiveness,

accountability.

transparency and accountability, *alignment with the overall strategy for competitiveness of the EU and subsidiarity.*

Or. en

Amendment 24

Proposal for a decision

Article 9 – paragraph 1 a (new)

Text proposed by the Commission

Amendment

1 a. The EIC be build into two instruments, the Pathfinder and the Accelerator, as described in Annex I of this Decision. Both instruments will aim to develop new iterative innovation patterns able to support innovation in a systemic way.

Or. en

Amendment 25

Proposal for a decision

Article 9 – paragraph 1 b (new)

Text proposed by the Commission

Amendment

1 b. Where appropriate, the EIC objectives and actions shall be linked to other parts of the Programme as well as other national and EU Funds, in particular EIT and InvestEU.

Or. en

Amendment 26

Proposal for a decision

Article 9 – paragraph 3 – point b

Text proposed by the Commission

Amendment

(b) does not lead to distortions of competition *contrary to the common*

(b) does not lead to distortions of competition *or crowding-out of private*

interest.

investments.

Or. en

Amendment 27

Proposal for a decision

Article 9 – paragraph 4 a (new)

Text proposed by the Commission

Amendment

4 a. The Commission shall ensure structural cooperation between the EIT and the EIC at all levels.

Or. en

Justification

Given that the EIT through its KICs have also been supporting high-potential innovators including providing access to private investors, venture capital, co-investments and other funding sources, a structural cooperation needs to be established between the EIT and EIC in order to ensure full complementary and avoid unnecessary duplication.

Amendment 28

Proposal for a decision

Article 10 – paragraph 1 – point e a (new)

Text proposed by the Commission

Amendment

(e a) the systematic and permanent evaluation process of the EIC actions;

Or. en

Amendment 29

Proposal for a decision

Article 10 – paragraph 2 – subparagraph 1 – introductory part

Text proposed by the Commission

Amendment

The EIC Board may upon request address recommendations to the Commission on:

The EIC Board may upon request, **and wherever appropriate in coordination with the EIT Governing Board**, address

recommendations to the Commission on:

Or. en

Justification

Given that the EIT Governing Board has a similar mandate, also mindful of knowledge, the EIT has built over the last 10-years, plus in the spirit of best use of European taxpayer money, the EIC Board and the EIT Governing Board should produce joint recommendations whenever appropriate.

Amendment 30

Proposal for a decision

Article 10 – paragraph 2 – subparagraph 1 – point b

Text proposed by the Commission

(b) identify in cooperation with relevant Commission services possible regulatory barriers faced by entrepreneurs, in particular those awarded support under the EIC component;

Amendment

(b) identify in cooperation with relevant Commission services **and the EIT** possible regulatory barriers faced by entrepreneurs, in particular those awarded support under the EIC component;

Or. en

Amendment 31

Proposal for a decision

Article 10 – paragraph 2 – subparagraph 2

Text proposed by the Commission

The EIC Board shall act in the interest of achieving the objectives of the EIC **component**. It shall act with integrity and probity and carry out its work efficiently and with transparency.

Amendment

The EIC Board shall act in the interest of achieving the objectives of the EIC **taking into account the competitiveness strategy of the European Union**. It shall act with integrity and probity and carry out its work efficiently and with transparency, **avoiding distortion of competition of the internal market**.

Or. en

Justification

The EIC will act in the competitive area. It must be fully ensured that interventions are not

distorting competition or creating unfair conditions.

Amendment 32

Proposal for a decision

Article 10 – paragraph 3 – subparagraph 1

Text proposed by the Commission

The EIC Board shall be composed of 15 to 20 high level individuals drawn from various parts of Europe's innovation ecosystem, including entrepreneurs, **corporate** leaders, investors and **researchers**. It shall contribute to outreach actions, with EIC Board members striving to enhance the prestige of the EIC brand.

Amendment

The EIC Board shall be composed of 15 to 20 high level individuals drawn from various parts of Europe's innovation ecosystem, including entrepreneurs, **industrial** leaders, **economists**, investors and **academic experts on innovation policy**. It shall contribute to outreach actions, with EIC Board members striving to enhance the prestige of the EIC brand.

Or. en

Justification

The EIC must be linked to commercial and industrial ecosystems. Universities and research and technology organisations play an important role in the innovation ecosystem.

Amendment 33

Proposal for a decision

Article 10 – paragraph 4 – subparagraph 1

Text proposed by the Commission

The EIC Board shall have a President who shall be appointed by the Commission following a transparent recruitment process. The President shall be a high profile public figure linked to the innovation world.

Amendment

The EIC Board shall have a President who shall be appointed by the Commission following a transparent recruitment process. The President shall be a high profile public figure linked to the **research and** innovation world.

Or. en

Justification

The profile and activities of the EIC Board's President should reflect the broad mission of the EIC and its funding instruments (Pathfinder, Accelerator) for advanced research and innovation

actions.

Amendment 34

Proposal for a decision

Article 10 – paragraph 4 – subparagraph 3

Text proposed by the Commission

The President shall chair the EIC Board, prepare its meetings, assign tasks to members, and may establish dedicated sub-groups, in particular to identify emerging technology trends from EIC's portfolio. He or she shall promote the EIC, act as interlocutor with the Commission and represent the EIC in the world of innovation. The Commission may provide for administrative support for the President to undertake his or her duties.

Amendment

The President shall chair the EIC Board, prepare its meetings, assign tasks to members, and may establish dedicated sub-groups, in particular to identify emerging technology trends from EIC's portfolio. He or she shall promote the EIC, act as interlocutor with the Commission and represent the EIC in the world of **research and** innovation. The Commission may provide for administrative support for the President to undertake his or her duties.

11 Work programmes

Amendment

Strategic Planning and Work programmes

Or. en

Amendment 36

Proposal for a decision

Article 11 – paragraph 1 – subparagraph 1

Text proposed by the Commission

The Programme shall be implemented by work programmes referred to in Article 110 of Financial Regulation. **They shall be prepared following a strategic planning**

Amendment

The implementation of the Specific Programme shall be based on specific R&I plans defined every two years, through delegated acts in accordance with

process as described in Annex I to this Decision.

Article 6 of the Regulation and following a transparent and strategic multiannual planning process of research and innovation activities, in particular for the pillar 'Global Challenges and European Industrial Competitiveness'. The consultations with national authorities, European Parliament, and stakeholders representatives about priorities and the suitable types of action and forms of implementation to use shall ensure alignment with other relevant Union programmes and increase consistency with national and regional RDI funding programmes and priorities, thereby strengthening the ERA.

Following the strategic R&I plan, the Programme shall be implemented by work programmes referred to in Article 110 of Financial Regulation.

Or. en

Amendment 37

Proposal for a decision

Article 11 – paragraph 2 – point b

Text proposed by the Commission

(b) all clusters under the pillar 'Global Challenges and Industrial Competitiveness', MSCA, research infrastructures, support to innovation ecosystems, *sharing* excellence and reforming and enhancing the European R&I System, in accordance with the examination procedure referred to in Article 12(4);

Amendment

(b) all clusters under the pillar 'Global Challenges and Industrial Competitiveness', MSCA, research infrastructures, support to innovation ecosystems, *spreading* excellence and reforming and enhancing the European R&I System, in accordance with the examination procedure referred to in Article 12(4);

Or. en

Amendment 38

Proposal for a decision

Annex I – paragraph 1

The implementation of Horizon Europe's programme-level objectives ***in an integrated manner will be ensured by multiannual Strategic Planning. Such planning*** will provide ***the*** focus on impact for the Programme ***overall*** and coherence between its different pillars, as well as synergy with other EU programmes and support to and from other EU policies.

The implementation of Horizon Europe is steered by an inclusive and transparent strategic planning process of the research and innovation activities funded by the programme.

The Strategic Planning process shall lead to the implementation of Horizon Europe's programme-level objectives thereby defining the funding priorities. It will provide focus on impact for the Programme and coherence between its different pillars, as well as synergy with other EU programmes and support to and from other EU policies. The strategic planning process and the adoption of the strategic R&I plan through a delegated act shall increase ownership and understanding for the purpose of the programme by a wider public and will allow the co-legislators, stakeholders and member states to be fully informed on the envisaged initiatives. The Strategic Planning will help to develop and implement of policy for the relevant areas covered, at EU level as well as complementing policy and policy approaches in the Member States. It will allow simplification of the funding landscape, avoid duplication and overlaps between funding possibilities and promote faster dissemination and uptake of research and innovation results.

In order to respond to these objectives, the Commission will launch an open consultation phase with Member States, the European Parliament, stakeholders, including civil society organisations, about the strategic priorities including missions, under the Global Challenges

and European Industrial Competitiveness pillar, and the suitable types of instruments, in particular the European partnerships. All partnerships and missions or any other strategic new initiative shall be identified in this Strategic R&I Plan before being implemented in work programmes.

In regards European Partnerships, the Strategic R&I Plan will outline and give the rationale for the creation, merge and phasing out of the European partnerships. All well-established partnerships, such as the Joint Technology Initiatives, will be considered for continuation beyond 2020 due to their added-value in bringing and leveraging private investment and contribution to synergies of funds (i.e. Clean Sky has signed partnerships with 17 Member States and regions around Europe). As in Horizon 2020, proposals for joint undertakings will be presented as Council Regulations.

On-going and new KICs will be defined in the legislative proposal for a Decision of the European Parliament and the Council on the EIT Strategic Innovation Agenda. 'FET Flagships' supported under Horizon 2020 (currently Graphene Flagship, Human Brain Project, Quantum Flagship) will continue to be supported under the Programme. As they present substantial analogies with missions, other 'FET flagships', if any, maybe supported under this Framework Programme as missions geared towards future and emerging technologies. The missions should strengthen the collaborative aspects of the Programme and reinforce existing European partnerships, which could work as supporting implementation pillars of the missions. The missions will have technological and societal elements and will be defined in close cooperation with all relevant DGs.

The Strategic Planning will identify existing links between Horizon Europe and other Union Programmes, including the Euratom programme, which offer possibilities for synergies between EU funds. Horizon Europe will become a point of reference for research and innovation in all related programmes across the EU budget and non-funding instruments. This will also promote faster dissemination and uptake of research and innovation results and avoid duplication and overlaps between funding possibilities. It will provide the frame for linking the direct research actions of the Joint Research Centre and other actions supported under the Programme, including the use of results for support to policy.

Or. en

Amendment 39

Proposal for a decision Annex I – paragraph 2

Text proposed by the Commission

Amendment

The Strategic Planning will promote strong engagement with citizens and civil society organisations at all stages of research and innovation, the co-creation of knowledge, effective promotion of gender equality, including the integration of the gender dimension in research and innovation content, and will ensure and promote the adherence to the highest ethics and integrity standards.

deleted

Or. en

Justification

Redrafted in amendment Annex I – paragraph 1

Amendment 40

Proposal for a decision Annex I – paragraph 3

Text proposed by the Commission

Amendment

It will include extensive consultations and exchanges with Member States, the European Parliament as appropriate, and with various stakeholders about priorities, including missions, under the 'Global Challenges and Industrial Competitiveness' pillar, and the suitable types of action to use, in particular European partnerships. ***deleted***

Or. en

Justification

Redrafted on amendment Annex I – paragraph 1

Amendment 41

Proposal for a decision Annex I – paragraph 4

Text proposed by the Commission

Amendment

Based on such extensive consultations, the Strategic Planning will identify common objectives and common areas for activities such as partnership areas (the proposed legal basis sets out only the instruments and criteria that will guide their use) and mission areas. ***deleted***

Or. en

Justification

Redrafted on amendment Annex I – paragraph 1

Amendment 42

Proposal for a decision Annex I – paragraph 5

Text proposed by the Commission

Amendment

The Strategic Planning will help to develop and realise the implementation of policy for the relevant areas covered, at EU level as well as complementing policy and policy approaches in the Member States. EU policy priorities will be taken into consideration during the Strategic Planning process to increase the contribution of research and innovation to the realisation of policy. It will also take into account foresight activities, studies and other scientific evidence and take account of relevant existing initiatives at EU and national level.

deleted

Or. en

Justification

Redrafted on amendment Annex I – paragraph 1

Amendment 43

Proposal for a decision Annex I – paragraph 6

Text proposed by the Commission

Amendment

The Strategic Planning will promote synergies between Horizon Europe and other Union Programmes, including the Euratom programme, thus becoming a point of reference for research and innovation in all related programmes across the EU budget and non-funding instruments. This will also promote faster dissemination and uptake of research and innovation results and avoid duplication and overlaps between funding possibilities. It will provide the frame for

deleted

linking the direct research actions of the Joint Research Centre and other actions supported under the Programme, including the use of results for support to policy.

Or. en

Justification

Redrafted on amendment Annex I – paragraph 1

Amendment 44

Proposal for a decision Annex I – paragraph 7

Text proposed by the Commission

Amendment

A Strategic Plan will lay out a multiannual strategy for realising content in the work programme (as set out in Article 11), while retaining sufficient flexibility to respond rapidly to unexpected opportunities and crises. As Horizon Europe is a programme for 7 years, the economic, societal and policy context in which it will operate may change significantly during its life-time. Horizon Europe needs to be able to swiftly adapt to these changes. There will therefore be the possibility to include support for activities beyond the descriptions set out below, where this is duly justified, to address major developments or unforeseen events, policy needs, or crisis situations, for example in response to serious threats to health arising for example from epidemics.

deleted

Or. en

Justification

Redrafted on amendment Annex I – paragraph 1

Amendment 45

Proposal for a decision Annex I – paragraph 8

Text proposed by the Commission

Amendment

In the implementation of Horizon Europe, particular attention will be paid to ensuring a balanced and broad approach to research and innovation, which is not only limited to the development of new products processes and services on the basis of scientific and technological knowledge and breakthroughs, but also incorporates the use of existing technologies in novel applications and continuous improvement and non-technological and social innovation. A systemic, cross-disciplinary, cross-sectoral and cross-policy approach to research innovation will ensure that challenges can be tackled while also giving rise to new competitive businesses and industries, fostering competition, stimulating private investments and preserving the level playing field in the internal market.

deleted

Or. en

Justification

Redrafted on amendment Annex I – paragraph 1

Amendment 46

Proposal for a decision Annex I – paragraph 9

Text proposed by the Commission

Amendment

In the 'Global Challenges and Industrial Competitiveness' and the 'Open Innovation' Pillars, research and innovation will be complemented with activities which operate close to the end-users and the market, such as

deleted

demonstration, piloting or proof-of-concept, excluding however commercialisation activities going beyond the research and innovation phase. This will also include support to demand-side activities that help accelerate the deployment and diffusion of a broad range of innovations. Emphasis will be put on non-prescriptive calls for proposals.

Or. en

Justification

Redrafted on amendment Annex I – paragraph 1

Amendment 47

Proposal for a decision Annex I – paragraph 10

Text proposed by the Commission

Amendment

Under the 'Global Challenges and Industrial Competitiveness' pillar, building on experience in Horizon 2020, the social sciences and the humanities will be fully integrated across all clusters, including specific and dedicated activities. Likewise, activities involving marine and maritime research and innovation will be implemented in a strategic and integrated manner in line with the EU Integrated Maritime Policy, the Common Fisheries Policy Policies and international commitments.

Amendment

Fast Track to Research and Innovation

Or. en

Amendment 52

Proposal for a decision Annex I – paragraph 13 a (new)

Text proposed by the Commission

Amendment

Horizon Europe will provide the possibility for all types of beneficiaries to apply for funding in a faster manner in certain parts of the Programme. This

approach will support research and innovation in all clusters, EIC and "spreading excellence" part, covering actions from fundamental research to close to market. Building on the success of the existing Fast Track to Innovation instrument in Horizon 2020, this approach will have a bottom-up-driven logic on the basis of continuously open calls and time to grant not exceeding six months. In the "spreading excellence" part, this approach will also support less developed EU countries to access funds in a faster and bottom-up manner. At least 15% of the budget of the Programme shall be granted following a fast track logic. No more than five legal entities shall participate in any one action.

Or. en

Justification

Europe needs a faster programme if it is to react effectively to today's global challenges.

Amendment 53

**Proposal for a decision
Annex I – paragraph 23**

Text proposed by the Commission

Amendment

Exceptionally, when justified by the requirement to appoint the best available experts and/or by the limited size of the pool of qualified experts, independent experts assisting or being members of the evaluation committee may evaluate specific proposals for which they declare a potential interest. In this case, the Commission or funding body shall take all necessary remedial measures to ensure the integrity of the evaluation process. The evaluation process will be managed accordingly, including a stage involving an interaction between diverse experts.

deleted

The evaluation committee will take into account the particular circumstances when identifying proposals for funding.

Or. en

Justification

This formulation opens the possibility of choosing any kind of expert who marked a potential interest. It should be clarified that these kinds of experts should have at least a qualification with relevance to the required topic.

Amendment 54

Proposal for a decision

Annex I – part I – point 1 – point 1.1 – paragraph 1

Text proposed by the Commission

Although the EU remains the largest producer of scientific publications in the world, *it is essentially a 'mass producer' of knowledge with, relative to its size, comparatively few centres of excellence that stand out at the world level and with large areas of average and poor performance.* Compared with the US and now China to some degree, the EU *still tends to follow* a 'distributed excellence model' in which resources are spread across a larger number of researchers and research institutions. Another challenge is that in many EU countries the public sector still does not offer sufficiently attractive conditions for the best researchers. These factors compound Europe's relative unattractiveness in the global competition for scientific talent.

Amendment

The EU remains the largest producer of scientific publications in the world. Compared with the US and now China to some degree, the EU *follows* a 'distributed excellence model' in which resources are spread across a larger number of researchers and research institutions. Another challenge is that in many EU countries the public sector still does not offer sufficiently attractive conditions for the best researchers. These factors compound Europe's relative unattractiveness in the global competition for scientific talent.

Amendment 59

Proposal for a decision

Annex I – part I – point 2 – point 2.1 – paragraph 2

Text proposed by the Commission

Europe is a scientific powerhouse with around 1.8 million researchers working in thousands of universities, research centres and world-leading companies. However, it is estimated that the EU will need to train and employ at least one million new researchers by 2027 in order to achieve the targets being set for increased investment in research and innovation. This need is particularly acute in the non-academic sector. The EU must reinforce its efforts to entice more young women and men to a career in research, to attract researchers from third countries, retain its own researchers and reintegrate European researchers working elsewhere back to Europe. In addition, in order to more widely spread excellence, the conditions under which researchers perform must be further improved throughout the European Research Area (ERA). In this respect, stronger links are needed notably with the European Education Area (EEA), the European Regional Development Fund (ERDF), and European Social Fund

Amendment

Europe is a scientific powerhouse with around 1.8 million researchers working in thousands of universities, research centres and world-leading companies. However, it is estimated that the EU will need to train and employ at least one million new researchers by 2027 in order to achieve the targets being set for increased investment in research and innovation. This need is particularly acute in the non-academic sector. The EU must reinforce its efforts to entice more young women and men to a career in research, to attract researchers from third countries, retain its own researchers and reintegrate European researchers working elsewhere back to Europe.

(ESF+).

To achieve this goal, attention should be paid to schemes facilitating family/work life balance, including adding more flexibility for researchers of both sexes to facilitate reconciliation of work and family life. Guaranteeing full gender equality in all sectors including science, technology and innovation is an essential condition for global economic development.

In addition, in order to *ensure synergies and* more widely spread excellence, *the Seal of Excellence label will continue to be applied to calls under MSCA and* the conditions under which researchers perform must be further improved throughout the European Research Area (ERA). In this respect, stronger links are needed notably with the European Education Area (EEa), the European Regional Development Fund (ERDF), and European Social Fund (ESF+).

Or. en

Amendment 60

Proposal for a decision

Annex I – part I – point 2 – point 2.1 – paragraph 4

Text proposed by the Commission

The Marie Skłodowska-Curie Actions (MSCA) focus on excellent research that is fully bottom-up, open to any field of research and innovation from basic research up to market take-up and innovation services. This includes research fields covered under the Treaty on the Functioning of the European Union and the Treaty establishing the European Atomic Energy Community (Euratom). If specific needs arise and additional funding sources become available, the MSCA may target certain *activities in specific challenges*

Amendment

The Marie Skłodowska-Curie Actions (MSCA) focus on excellent research that is fully bottom-up, open to any field of research and innovation from basic research up to market take-up and innovation services. This includes research fields covered under the Treaty on the Functioning of the European Union and the Treaty establishing the European Atomic Energy Community (Euratom). If specific needs arise and additional funding sources become available, the MSCA may target certain, types of research and innovation

(incl. identified missions), types of research and innovation institutions, or geographical locations in order to respond to the evolution of Europe's requirements in terms of skills, research training, career development and knowledge sharing.

institutions, or geographical locations in order to respond to the evolution of Europe's requirements in terms of skills, research training, career development and knowledge sharing.

Or. en

Justification

The MSCA should remain a fully bottom-up programme (as stated in the first sentence of the paragraph).

Amendment 61

Proposal for a decision

Annex I – part I – point 2 – point 2.2 – point 2.2.2 – paragraph 2 – indent 1

Text proposed by the Commission

- Training programmes to equip researchers with a diversity of skills relevant to current and future global challenges.

Amendment

- Training programmes *where appropriate in complementarity with EITs educational activities*, to equip researchers with a diversity of skills relevant to current and future global challenges.

Or. en

Justification

The EIT provides entrepreneurship education to students, not least by involving industries in the curricula. Like the MSCA the EIT Label model is based on promoting mobility as a central requirement for master's and doctoral programmes. Enhancing complementarity with the MSCA would ensure a higher added value for both initiatives, increase streamlining and also avoid unnecessary duplication.

Amendment 62

Proposal for a decision

Annex I – part I – point 2 – point 2.2 – point 2.2.3 – paragraph 2 – indent 1

Text proposed by the Commission

- Training programmes to foster excellence and spread best practices across

Amendment

- Training programmes, *developed in cooperation with other parts of Horizon*

institutions and research and innovation systems;

Europe, to foster excellence and spread best practices across institutions and research and innovation systems;

Amendment 63

Proposal for a decision

Annex I – part I – point 3 – point 3.1 – paragraph 1

Text proposed by the Commission

State of the art research infrastructures provide key services to research and innovation communities, playing an essential role in extending the frontiers of knowledge. Supporting research infrastructures at the EU level helps to mitigate what in many cases is the reality of scattered national research infrastructures and pockets of scientific excellence, as well as *tackling the low* circulation of knowledge across silos.

Amendment

State of the art research infrastructures provide key services to research and innovation communities, playing an essential role in extending the frontiers of knowledge. Supporting research infrastructures *of all sizes* at the EU level helps to mitigate what in many cases is the reality of scattered national *and regional* research infrastructures and pockets of scientific excellence, as well as *increasing the* circulation of knowledge across silos.

Or. en

Amendment 64

Proposal for a decision

Annex I – part I – point 3 – point 3.1 – paragraph 2

Text proposed by the Commission

The overall aim is to *endow Europe* with world-class sustainable research infrastructures open and accessible to all researchers in Europe and beyond, which fully exploit their potential for scientific advance and innovation. Key objectives are to reduce the fragmentation of the research and innovation ecosystem, avoiding duplication of effort, and better coordinate the development *and use* of research infrastructures. It is crucial to support open access to research infrastructures for all European researchers as well as, through

Amendment

The overall aim is to *improve Europe's endowment* with world-class sustainable research infrastructures open and accessible to all researchers in Europe and beyond, which fully exploit their potential for scientific advance and innovation. Key objectives are to reduce the fragmentation of the research and innovation ecosystem, *ensure continuous modernisation*, avoiding duplication of effort, and better coordinate the development, *use and accessibility* of research infrastructures, *including in less developed Member*

the European Open Science Cloud (hereafter 'EOSC'), increased access to digital research resources, specifically tackling the currently sub-optimal embracement of open science and open data practises. Equally, the EU needs to tackle the rapid increase of global competition for talent by attracting third country researchers to work with European world-class research infrastructures. Increasing the competitiveness of European industry is also a major objective, supporting key technologies and services relevant for research infrastructures and their users, thus improving the conditions for supply of innovative solutions.

States. It is crucial to support open access to research infrastructures for all European researchers as well as, through the European Open Science Cloud (hereafter 'EOSC'), increased access to digital research resources, specifically tackling the currently sub-optimal embracement of open science and open data practises. Equally, the EU needs to tackle the rapid increase of global competition for talent by attracting third country researchers to work with European world-class research infrastructures. Increasing the competitiveness of European industry is also a major objective, supporting key technologies and services relevant for research infrastructures and their users, thus improving the conditions for supply **and utilization** of innovative solutions.

Or. en

Justification

By providing broad access the long-term scientific relevance of RI will be safeguarded. Research and innovation performed and pursued in pillar 2 needs to tap in existing research infrastructures. It is fundamental to ensure their wide accessibility and re-use. The impact of research infrastructures can better be measured through the use of those 'innovative solutions'.

Amendment 65

Proposal for a decision

Annex I – part I – point 3 – point 3.1 – paragraph 3

Text proposed by the Commission

Past framework programmes have made a significant contribution towards the more efficient and effective use of national infrastructures as well as developed with the European Strategy Forum on Research Infrastructures (ESFRI) a coherent and strategy-led approach to policy making on pan-European research infrastructures. This strategic approach has generated clear advantages, including reducing duplication

Amendment

Past framework programmes have made a significant contribution towards the more efficient and effective use of national infrastructures **and the removing barriers for use by all European researches through trans-national access**, as well as developed with the European Strategy Forum on Research Infrastructures (ESFRI) a coherent and strategy-led approach to policy making on pan-

of effort with more efficient overall use of resources, as well as standardising processes and procedures.

European research infrastructures. This strategic approach has generated clear advantages, including reducing duplication of effort with more efficient overall use of resources, as well as standardising **and harmonising** processes and procedures.

Or. en

Justification

This amendment tries to emphasize the transnational access program which has been recognized, also by members of the EC and by various evaluations of the Framework Programmes, as a major success story of research funding of several consecutive framework programs. There are already many national processes and procedures that are well standardized, but they are not harmonized among different research infrastructure facilities in different Member States.

Amendment 66

Proposal for a decision

Annex I – part I – point 3 – point 3.1 – paragraph 4

Text proposed by the Commission

EU supported activity will provide added value through: consolidating and optimised existing research infrastructures alongside efforts to develop new infrastructures; establishing the European Open Science Cloud (EOSC) as an effective scalable and sustainable environment for data-driven research; the interconnection of national and regional research and education networks, enhancing and securing high-capacity network infrastructure for massive amounts of data and access to digital resources across borders and domain boundaries; overcoming barriers preventing the best research teams from accessing the best research infrastructures services in the EU; fostering the innovation potential of research infrastructures, focused on technology development and co-innovation as well as increased use of research infrastructures by industry.

Amendment

EU supported activity will provide added value through: consolidating and optimised existing research infrastructures alongside efforts to develop new infrastructures; establishing the European Open Science Cloud (EOSC) **and the European Cultural Heritage Cloud- a Museum Collaboration Space-** as an effective scalable and sustainable environment for data-driven research; the interconnection of national and regional research and education networks, enhancing and securing high-capacity network infrastructure for massive amounts of data and access to digital resources across borders and domain boundaries; **creating research and project platforms to** overcoming barriers preventing the best research teams from accessing the best research infrastructures services in the EU; fostering the innovation potential of research infrastructures,

focused on technology development and co-innovation as well as increased use of research infrastructures by industry.

Or. en

Amendment 67

Proposal for a decision

Annex I – part I – point 3 – point 3.1 – paragraph 5

Text proposed by the Commission

And the international dimension of EU research infrastructures must be reinforced, fostering stronger cooperation with international counterparts and international participation in European research infrastructures for mutual benefit.

Amendment

And the international dimension of EU research infrastructures must be reinforced, fostering stronger cooperation **and connectivity** with international counterparts and international participation in European research infrastructures for mutual benefit.

Or. en

Amendment 68

Proposal for a decision

Annex I – part I – point 3 – point 3.2 – point 3.2.1 – paragraph 1

Text proposed by the Commission

The establishment, operation and long-term sustainability of research infrastructures identified by ESFRI *is* essential for the EU to ensure a leading position in frontier research, the creation and use of knowledge and the competitiveness of its industries.

Amendment

The establishment, operation and long-term sustainability of research infrastructures, **including the ones** identified by ESFRI, **are** essential for the EU to ensure a leading position in frontier research, the creation and use of knowledge and the competitiveness of its industries.

Or. en

Justification

Not only those research infrastructures identified by ESFRI are crucial for maintaining a leading position of Europe in frontier research

Amendment 69

Proposal for a decision

Annex I – part I – point 3 – point 3.2 – point 3.2.1 – paragraph 2

Text proposed by the Commission

The European Open Science Cloud (EOSC) should become an effective and comprehensive delivery channel for research infrastructures services and should **provide** Europe's research communities **with** the next generation of data services for harvesting, storing, processing (e.g. analytics, simulation, visualisation services) and sharing big science data. The EOSC should also provide researchers in Europe with **access to** the majority of data generated and collected by research infrastructures as well **as** to HPC and exascale resources deployed under the European Data Infrastructure (EDI)¹³.

¹³ The European Data Infrastructure will underpin the European Open Science cloud by providing world-class High Performance Computing capability, high speed connectivity and leading-edge data and software services.

Amendment

The European Open Science Cloud (EOSC) should become an effective and comprehensive delivery channel for research infrastructures services and should **allow** Europe's research communities **to develop** the next generation of data services for harvesting, storing, processing (e.g. analytics, simulation, visualisation services) and sharing big science data. The EOSC should also provide researchers in Europe with **services encouraging the storage and processing of** the majority of **quality-checked** data generated and collected by **researchers inside and outside of** research infrastructures **and should** as well **give access** to HPC and exascale resources deployed under the European Data Infrastructure (EDI)¹³. **The EOSC, by default has to be resilient against digital threats, by providing adequate horizontal trust and identity, and cybersecurity services.**

¹³ The European Data Infrastructure will underpin the European Open Science cloud by providing world-class High Performance Computing capability, high speed connectivity and leading-edge data and software services.

Or. en

Amendment 70

Proposal for a decision

Amendment 71

Proposal for a decision

Annex I – part I – point 3 – point 3.2 – point 3.2.1 – paragraph 4 – indent 2

Text proposed by the Commission

– The European Open Science Cloud, including: scalability and sustainability of the access channel; effective federation of European, national, regional and institutional resources; its technical and policy evolution to cope with new research needs and requirements (e.g. usage of sensitive data sets, privacy by design); data inter-operability and compliance with the FAIR principles; and a wide user base;

Amendment

– The European Open Science Cloud, including: scalability and sustainability of the access channel; effective federation of European, national, regional and institutional resources; its technical and policy evolution to cope with new research needs and requirements (e.g. usage of sensitive data sets, privacy by design) ***in tune with the researchers' communities***; data inter-operability and compliance with the FAIR principles; and a wide user base;

Or. en

Amendment 72

Proposal for a decision

Annex I – part I – point 3 – point 3.2 – point 3.2.2 – paragraph 1

Text proposed by the Commission

The research landscape will be significantly enhanced through ensuring openness to key international, national and regional research infrastructures for all EU researchers and integrating their services when necessary so as to harmonise access conditions, improve and enlarge service provision and encourage common development strategy of high tech components and advanced services through innovation actions.

Amendment

The research landscape will be significantly enhanced through ensuring openness to key international, national and regional research infrastructures for all EU researchers and integrating their services when necessary so as to harmonise access conditions, improve and enlarge service provision and encourage common development strategy of high tech components and advanced services through innovation actions ***that cater to the needs of the researchers' communities and thus encourage their active participation.***

Or. en

Amendment 73

Proposal for a decision

Annex I – part I – point 3 – point 3.2 – point 3.2.2 – paragraph 2 – indent 2

Text proposed by the Commission

– Networks of pan EU, national and regional research infrastructures ***addressing global challenges*** for the provision of access to researchers as well as for the harmonisation and improvement of the infrastructures' services;

Amendment

– Networks of pan EU, national and regional research infrastructures, ***including small and medium-sized ones***, for the provision of access to researchers as well as for the harmonisation and improvement of the infrastructures' services;

Or. en

Justification

Small and medium sized research infrastructures remain important for R&I ecosystems. In addition, since research infrastructures can be used for a wide range of scientific and technological domains, a reference to global challenges is not needed.

EUROPEAN INDUSTRIAL
COMPETITIVENESS**

Or. en

Amendment 75

Proposal for a decision Annex I – part II – paragraph 4

Text proposed by the Commission

The EU will benefit as user and producer of technologies and industries showcasing how modern industrialised, sustainable inclusive, open and democratic society and economy can function and develop. The growing economic-environmental-social examples of the sustainable industrial economy of the future will be fostered and boosted, be they for: health and well-being for all; or resilient inclusive and secure societies; or available clean energy and mobility; or a digitised economy and society; or a transdisciplinary and creative industry; or space marine or land-based solutions; or food and nutrition solutions; sustainable use of natural resources climate protection and adaptation, all generating wealth in Europe and offering higher quality jobs. Industrial transformation will be crucial.

Amendment

The EU will benefit as user and producer of **knowledge**, technologies and industries showcasing how modern industrialised, sustainable inclusive, open and democratic society and economy can function and develop. The growing economic-environmental-social examples of the sustainable industrial economy of the future will be fostered and boosted, be they for: health and well-being for all; or resilient inclusive and secure societies; or available clean energy and mobility; or a digitised economy and society; or a transdisciplinary and creative industry; or space marine or land-based solutions; or food and nutrition solutions; sustainable use of natural resources climate protection and adaptation, all generating wealth in Europe and offering higher quality jobs. Industrial transformation will be crucial.

Or. en

Amendment 76

Proposal for a decision Annex I – part II – paragraph 5

Text proposed by the Commission

Research and innovation under this pillar of Horizon Europe is grouped into integrated clusters of activities. Rather than addressing sectors, the investments aim at systemic changes for our society and economy along a sustainability vector. These will only be achieved if all actors, both private and public, engage in co-designing and co-creating research and innovation; bringing together end-users, scientists, technologists, producers, innovators, businesses, educators, citizens and civil society organisations. Therefore, none of the thematic clusters is intended for only one set of actors.

Amendment

Research and innovation under this pillar of Horizon Europe is grouped into integrated clusters of activities. Rather than addressing sectors, the investments aim at systemic changes for our society and economy along a sustainability vector. These will only be achieved if all actors, both private and public, engage in co-designing and co-creating research and innovation; bringing together end-users, **researcher**, scientists, technologists, producers, innovators, businesses, educators, citizens and civil society organisations. Therefore, none of the thematic clusters is intended for only one set of actors.

Or. en

Amendment 77

**Proposal for a decision
Annex I – part II – paragraph 6**

Text proposed by the Commission

Clusters will develop and apply digital, key enabling and emerging technologies as part of a common strategy to promote the EU's industrial leadership. Where appropriate this will use EU space-enabled data and services.

Amendment

Clusters will **support knowledge creation in all its stages of development, including early stage research activities**. Clusters **will also** develop and apply digital, key enabling and emerging technologies as part of a common strategy to promote the EU's industrial leadership. Where appropriate this will use EU space-enabled data and services.

Or. en

Amendment 78

**Proposal for a decision
Annex I – part II – paragraph 7**

Text proposed by the Commission

There will be support to bring technology from lab to market and to develop applications including pilot lines and demonstrators, measures to stimulate market uptake and to boost private sector commitment. Synergies with other programmes will be maximised.

Amendment

There will be support to bring technology from lab to market and to develop applications including pilot lines and demonstrators, measures to stimulate market uptake and to boost private sector commitment. Synergies with other *parts of Horizon Europe, especially the EIT, as well as other* programmes will be maximised.

Or. en

Justification

The Mission of the EIT is to provide solutions to the most pressing global challenges facing society. The EIT is already today delivering on SDG's and should, therefore, be closely interlinked across all clusters. There is also a high potential for synergies between the activities of the KICs and most of the clusters which should be explored further and maximised wherever possible

Amendment 79

Proposal for a decision

Annex I – part II – point 1 – point 1.1 – paragraph 3

Text proposed by the Commission

Health research and innovation research and innovation have played a significant part in this achievement but also in improving productivity and quality in the health and care industry. However, the EU continues to face novel, newly emerging or persisting challenges that are threatening its citizens and public health, the sustainability of its health care and social protection systems, as well as the competitiveness of its health and care industry. Major health challenges in the EU include: the lack of effective health promotion and disease prevention; the rise of non-communicable diseases; the spread of antimicrobial drug resistance and the

Amendment

Health research and innovation research and innovation have played a significant part in this achievement but also in improving productivity and quality in the health and care industry. However, the EU continues to face novel, newly emerging or persisting challenges that are threatening its citizens and public health, the sustainability of its health care and social protection systems, as well as the competitiveness of its health and care industry. Major health challenges in the EU include: the lack of effective health promotion and disease prevention; the rise of non-communicable diseases; the spread of antimicrobial drug resistance and the

emergence of infectious epidemics; increased environmental pollution; the persistence of health inequalities among and within countries affecting disproportionately people that are disadvantaged or in vulnerable stages of life; the detection, understanding, control, prevention and mitigation of health risks in a rapidly changing social, urban and natural environment; the increasing costs for European health care systems and the progressive introduction of personalised medicine approaches and digitalisation in health and care; and the increasing pressure on the European health and care industry to remain competitive in and by developing health innovation vis-a-vis new and emerging global players.

emergence of infectious epidemics; increased environmental pollution; the persistence of health inequalities among and within countries affecting disproportionately people that are disadvantaged or in vulnerable stages of life; the detection, understanding, control, prevention and mitigation of health risks in a rapidly changing social, urban and natural environment; the increasing costs for European health care systems and the progressive introduction of personalised medicine approaches *including the relevant research* and digitalisation in health and care; and the increasing pressure on the European health and care industry to remain competitive in and by developing health innovation vis-a-vis new and emerging global players.

Or. en

Justification

Personalised medicine is not ready for implementation without further research. - Translational research is key for the success of health-related research, it brings research results from the lab to the patient and back to the lab for further improvement. Without a strong focus on basic biomedical research the seedbed for future improvements for patients loses its input.

Amendment 80

Proposal for a decision

Annex I – part II – point 1 – point 1.1 – paragraph 4

Text proposed by the Commission

These health challenges are complex, interlinked and global in nature and require multidisciplinary, cross-sectorial and transnational collaborations. Annex I – part II – point 2 – point 2.1 – paragraph 2 a (new)

Text proposed by the Commission

Amendment

In this context Cultural and Creative Industries(CCI)s play a key role in the preservation and promotion of European cultural and linguistic diversity, strengthen the sense of belonging to the European and regional identity, contribute to transmit knowledge and values, and safeguard the tangible and intangible European heritage for current and future generations. At the same time, they strengthen social cohesion, and contribute significantly to the EU economy in terms of employment, investment, growth, and innovation and contribute significantly to Europe's competitiveness on a global scale.

Or. en

Amendment 89

Proposal for a decision

Annex I – part II – point 2 – point 2.1 – paragraph 3

Text proposed by the Commission

Amendment

European citizens, state institutions and the economy need to be protected from the continued threats of organised crime, including firearms trafficking, drug trafficking and trafficking in human beings. Strengthening protection and security through better border management is also key. Cybercrime is on the increase and related risks are diversifying as the economy and society digitalise. Europe needs to continue its efforts to improve cybersecurity, digital privacy, personal data protection and combat the spread of false and harmful information in order to safeguard democratic and economic stability. Lastly, further efforts are required to limit the effects on lives and livelihoods of extreme weather events which are intensifying due to climate change, such as floods, storms or droughts leading to forest fires, land degradation and other natural disasters, e.g. earthquakes. Disasters, whether natural or man-made, can put at risk important societal functions, such as health, energy supply and government.

Or. en

Justification

Amendment 88 - 90 shift to Secure Society Cluster

Amendment 90

Proposal for a decision

Annex I – part II – point 2 – point 2.1 – paragraph 4

Text proposed by the Commission

Amendment

The magnitude, complexity and trans-national character of the challenges call multi-layered EU action. Addressing such critical social, political, cultural and economic issues, as well as security challenges, only at national level would carry the danger of inefficient use of resources, fragmented approaches and dissimilar standards of knowledge and capacity.

deleted

Or. en

Amendment 91

Proposal for a decision

Annex I – part II – point 2 – point 2.1 – paragraph 5

Text proposed by the Commission

Amendment

Security research is part of the wider comprehensive EU response to security threats. It contributes to the capability development process by enabling the future availability of technologies and applications to fill capability gaps identified by policy-makers and practitioners. Already, funding to research through the EU's framework programme has represented around 50% of total public funding for security research in the EU. Full use will be made of available instruments, including the European space programme (Galileo and EGNOS, Copernicus, Space Situational Awareness and Governmental Satellite Communications). Synergies are sought with the activities supported by EU-funded defence research and duplication of funding is avoided. Cross-border collaboration contributes to developing a European single security market and improving industrial performance, underpinning the EU's autonomy.

Amendment 92**Proposal for a decision****Annex I – part II – point 2 – point 2.2 – point 2.2.2 – introductory part***Text proposed by the Commission**Amendment*

2.2.2. Cultural Heritage

2.2.2. Cultural and Creative Industries including Cultural Heritage

Or. en

Amendment 93**Proposal for a decision****Annex I – part II – point 2 – point 2.2 – point 2.2.2 – paragraph 1***Text proposed by the Commission**Amendment*

Cultural heritage is the fabric of our lives, meaningful to communities, groups and societies, giving a sense of belonging. It is the bridge between the past and the future of our societies. It is a driving force of local economies and a powerful source of inspiration for creative and cultural industries. Accessing, conserving, safeguarding and restoring, interpreting and harnessing the full potential of our cultural heritage are crucial challenges now and for future generations. Cultural heritage is the major input and inspiration for the arts, traditional craftsmanship, the cultural, entrepreneurial and creative sectors that are drivers of sustainable economic growth, new job creation and external trade.

It becomes strategically important to support innovation and research activities in the field of European Cultural and Creative Industries (CCIs), as they are capable of preserving linguistic and cultural diversity, pluralism, and the offer of innovative and high-quality services, especially in the context of a convergent and globalised market. Cultural and Creative Industries build a bridge between arts, culture, business and technology. Furthermore, specially in the field of digitalisation, CCIs play a key role in reindustrialising Europe, are a driver for growth and are in a strategic position to trigger innovative spill-overs in other industrial sectors, such as tourism, retail, and digital technologies and engineering. Cultural heritage is an integral part of the CCIs. Cultural Heritage the fabric of our lives, meaningful to communities, groups and societies, giving a sense of belonging. It is the bridge between the past and the future of our societies. It is a driving force of local economies and a powerful source

of inspiration for creative and cultural industries. Accessing, conserving, safeguarding and restoring, interpreting and harnessing the full potential of our cultural heritage are crucial challenges now and for future generations. Cultural heritage is the major input and inspiration for the arts, traditional craftsmanship, the cultural, entrepreneurial and creative sectors that are drivers of sustainable economic growth, new job creation and external trade. ***Furthermore heritage tourism and museums can offer new cultural and economic perspectives, above all to post-industrial regions, and keep traditional European know-how alive.***

Text proposed by the Commission

Amendment

- ***Establish a “Cultural Heritage Cloud”:***

A museum collaboration space will be created in order to grant accessibility of cultural heritage through new

technologies as well as to encourage and to facilitate transmission of know-how and skills such as restoring art works etc. Furthermore the cloud will be closely linked to the Europeana platform.

The Cultural Heritage Cloud will:

*-be a research and project based collaboration space between museums, cultural professionals and the public-
Make research and knowledge accessible to the public*

-Provide the opportunity to set up individual workgroups and project structures

-Provide and integrate links to existing platforms such as Europeana

-Be a European cultural counterpart to commercially driven cloud services

Cross-cutting activities: In Horizon Europe creativity and design will be a cross-cutting issue that will be integrated in projects throughout the programme in order to new technologies, business models and competences as well as translating creative and intersiplinary solutions into economic and social value.

Or. en

Justification

The exchange and long-term storage of information and know-how is of particular importance in this context. Currently, there is a lack of a suitable digital platform in this area, which offers solutions to the very practical problems of cross-collection collaboration, especially on a European scale. The establishment of a digital European Museum Collaboration Space can help solve these challenges.

2.2.6. Cybersecurity **deleted**

Malicious cyber activities not only threaten our economies but also the very functioning of our democracies, our freedoms and our values. Cyber threats are often criminal, motivated by profit, but they can also be political and strategic. Our future security and prosperity depend on improving our ability to protect the EU against cyber threats. The digital transformation requires improving cybersecurity substantially, to ensure the protection of the huge number of IoT devices expected to be connected to the internet, including those controlling power grids, cars and transport networks, hospitals, finances, public institutions, factories, homes. Europe must build resilience to cyber-attacks and create effective cyber deterrence.

Broad Lines

- *Technologies across the digital value chain (from secure components to cryptography and self-healing software and networks);*
- *Technologies to address current cybersecurity threats, anticipating future*

needs, and sustaining a competitive industry;

– *A European cybersecurity competence network and competence centre.*

2 a. CLUSTER 'SECURE SOCIETY'

2.1 Rationale

The EU stands for a unique way of combining democratic values, societal well-being, economic growth, and international responsibilities. It is important to protect her acquisitions, citizens, public institutions, economy and political stability from the threats of manifold kind, perpetrators and origins.

Security research is part of the wider EU efforts to meet this challenge. It contributes to the capability development process by enabling future availability of technologies, solutions and applications to fill gaps identified by policy-makers, experts, and end-users, especially public authorities. Such research and innovation responds to the commitment of the Rome Agenda to work towards "a safe and secure Europe", contributing to a

Security Union.

Terrorism, radicalisation, politically motivated violence, cyber-attacks and hybrid threats, organised-, business-/taxes avoidance-, and environmental-crime, threats to ICT- and other critical and supply infrastructures, raise major concerns and put particular strain on societies. Europe needs to continue its efforts to improve cybersecurity, digital privacy, personal data protection and combat the spread of false and harmful information in order to safeguard democratic and economic stability.

In order to anticipate, prevent and manage risks and threats, it is not only necessary to commit to research but furthermore to develop and apply innovative technologies, solutions, foresight tools and knowledge, stimulate cooperation between providers and public users, find solutions, prevent and combat the abuse of privacy and breaches of human rights in Internet and elsewhere, while ensuring European citizens' individual rights and freedom.

To avoid multiple spending research of public security authorities shall be enforced in efforts of multi- and international exchange and cooperation. Public security authorities shall be invited to participate in EU research and innovation efforts to further their capabilities to cooperate and communicate on all appropriate levels, to exchange data, to benefit from common standards in technologies, procedures, equipment, and up-to-date results in crime related sciences, training, and supporting advantages of expert knowledge.

2.2 Areas of Intervention

2.2.1 Organised Crime; Terrorism, Extremism, Radicalisation and Politically

Motivated Violence

Organised Crime, terrorism, extremism, radicalisation and politically motivated violence cause high risks to each citizen as well as to Europe's society, economy and democratic stability. Their perpetrators range from locally acting inexpert individuals to highly professional organisations operating internationally. Research in humanities and technologies are required to detect, prevent and counter their activities.

Broad Lines

- Human and social dimensions of criminality and violent radicalisation, in relation to those engaged or potentially engaged in such behaviour as well as to those affected or potentially affected;- Innovative approaches and technologies for security end-users, especially public security authorities;

- Technologies and standards of operation for protecting infrastructure, open and public spaces as well as areas and buildings for the gathering of people;- Prediction, detection, prevention, and protection against attempts and perpetrators of serious and organised crime, politically motivated radicalisation, violence, and terrorism;

2.2.2 Border Protection Management

To advance safety and security within the EU requires up-to-date abilities of border protection and management. This includes area reconnaissance and surveillance (air, ground, sea), stable cooperation and data-exchange with foreign authorities, including interoperability capabilities with local, regional, national and international command-, control- and communication-centres as well as implementing solutions for border-protection, incident responding, risk-detection and crime-

prevention. Further to include is research on predictive policing and algorithm-based early warning applications, automated surveillance technologies using various kinds of sensors. While evaluating their impact and potential to enhance security efforts, at the same time it shall be evaluated the potential of these solutions, technologies and equipment to contribute to the integrity of those approaching external borders by especially land and sea.

Research should support the improvement of the integrated European border management, including through increased cooperation with candidate, potential candidate and EU Neighbourhood Policy countries. It will further assist EU efforts of coping with migration.

Broad Lines

- Identifying forged and otherwise manipulated documents;*
- Detecting illegal transportation/trafficking of persons and goods;*
- Furthering response capabilities to border incidents;*
- Modernisation of border areal reconnaissance and surveillance equipment;*

2.2.3 ICT- and Cyber-Security, Privacy, Data Protection

Malicious and hostile cyber activities threaten our societies and their citizens, the stable and secure functioning of public authorities and institutions, economies and also the very functioning of Europe's democratic institutions, our freedoms and values. Incidents involving public institutions have occurred already and are likely to increase in the course of further integration of digital and cyber applications in administrative and

economic procedures as well as in private and individual use.

Cybercrime is on the increase, related risks are diversifying as the economy and society digitalise further on. Europe needs to continue its efforts to improve cyber- and overall ICT-security, digital privacy, personal data protection and combat the spread of false and harmful information in order to safeguard democratic and economic stability.

Future security and prosperity depend on improving abilities to protect the EU against such threats, to prevent, detect and counter malicious cyber activities, often requiring close and rapid cross-border cooperation. Especially the digital transformation requires improving cybersecurity substantially, to ensure the protection of the huge number of IoT devices expected to be connected to the internet. Europe must keep up all efforts to enforce resilience to ICT- attacks and promote effective deterrence.

Collection and evaluation of personal as well as mass data (Big Data) keeps increasing insecurity related activities. Therefore, it keeps being important to ensure high standards of data protection, privacy and freedom.

Broad Lines

- Expanding detection, prevention, defence and countering technologies;*
- Strengthening abilities to decipher and decrypt for public authorities;*
- Technologies to detect and monitor illicit electronic way of payment and financial flows;- Increase all necessary abilities of appropriate authorities, especially EUROPOL/EC3 and ENISA;*
- Ensuring the protection of personal data in law enforcement activities, particularly in view of rapid technological*

developments;

2.2.4 Protecting Critical Infrastructures, Supply Chains and Transport/Transfer Facilities and Disaster-Resilience

New technologies, processes, methods and dedicated capabilities will help to protect critical infrastructures, systems and services which are essential for the proper functioning of society and economy, including communications, transport, finance, health, food, water, energy, logistic and supply chain, and environment.

Disasters arise from multiple sources, whether natural, man-made or resulting from cascading risks. Efforts are required to limit the effects on lives and livelihoods, harm to health and the environment, economic and material damage, to ensure food and medicine supply, security and basic means of communication.

Broad Lines

- Capacities of society to better manage and reduce disaster risk, including through nature-based solutions, by enhancing prevention, preparedness and response to existing and new risks and improving the resilience of these various infrastructures;

- Enhancing moving capabilities for search and rescue equipment, vehicles, supply and forces;

- Technologies, equipment and procedures to prevent the outbreak of or to contain epidemics;

2.2.5 Piracy and Counterfeit of Products
Countering piracy and counterfeit of products remain of serious concern for the European economy, cultural and creative industries (CCIs) and citizens alike. These illicit activities cause serious losses of taxes, revenues and personal

income as well as putting employment in Europe at risk.

Furthermore, they contribute to environmental damages and inadequate labour conditions globally.

Deficient products imply risks for causing damage to persons and property. Such impacts need to be addressed and solutions be found to tackle piracy and counterfeit of products as well as to enforce appropriate public authorities to prevent, detect, investigate and counter these crimes and related illegal activities in cooperation.

To include are efforts to promote the protection of intellectual property.

Broad Lines

- Promoting techniques of identifying products;*
- Enhancing protection of original parts and goods;*
- Technologies to control transported products (real-time) and data-exchange between producers, transporter, custom-authorities and recipients*

2.2.6 Promoting Coordination, Cooperation and Synergies

To ensure the ability to deploy, manage, control and command inter-authority procedures up-to-date technology and standards are required. The aim ought to be to equip public authorities and other forces to be deployed with exchangeable equipment, to integrate EU-wide standard procedures of operation, responding, reporting and data-exchange.

Obliging to responsible spending security related HEU-funded research and innovation should promote coordination and synergetic effects of appropriate activities, contributing to efficient spending of funds and to avoiding duplications. This shall also be sought

regarding activities supported by EU-funded defence research, including exchange and consultation mechanisms with defence research associated authorities, especially the EDA, recognising that there are areas of dual-use technology.

Standards ensure common development, production and implementation as well as abilities of exchange, interoperability and compatibility of services, procedures, technologies and equipment.

Broad Lines

- Technologies and equipment with basic operation requirements to be applicable by all MS forces and authorities of the same line (police, rescue, disaster management, communication etc.) equally;

- Interoperability of equipment and procedures to facilitate cross-border and inter-agency operational ability;

- Identification of standardisation gaps among MS and with non-EU partners;

An adequate budget should be allocated to agencies to further promote their ability to participate in as well as from EU research & innovation and in order to manage relevant projects, to exchange demands, results and ambitions as well as to cooperate and coordinate efforts with other agencies and certain non-EU authorities like CTG and IKPO. As for security related research and innovation these are especially CEPOL, EASA, ECDC, EMCDDA, EMSA, ENISA, EU-LISA, EUIPO, EUROPOL, FRONTEX and SatCen.

Or. en

Amendment 119

Proposal for a decision

Annex I – part II – point 3 – point 3.1 – paragraph 3

Text proposed by the Commission

Digitisation is a major driver. As it continues at a rapid pace across all sectors, investment in priority areas ranging from artificial intelligence to next generation internet, high performance computing, photonics and nano-electronics, becomes essential for the strength of our economy and the sustainability of our society. Investing, producing and using ICT provides a major boost to EU economic growth, amounting to an increase of 30% between 2001 and 2011 alone.

Amendment

Digitisation is a major driver. As it continues at a rapid pace across all sectors, investment in priority areas ranging from artificial intelligence to next generation internet, high performance computing, photonics, ***quantum technologies*** and nano-electronics, becomes essential for the strength of our economy and the sustainability of our society. Investing, producing and using ICT provides a major boost to EU economic growth, amounting to an increase of 30% between 2001 and 2011 alone.

Or. en

Amendment 120

Proposal for a decision

Annex I – part II – point 3 – point 3.1 – paragraph 7

Text proposed by the Commission

The EU has the unique chance of being a global leader and increase its share of world markets, by showcasing how digital transformation, leadership in key enabling and space technologies, the transition to a low-carbon, circular economy and competitiveness can reinforce each other through scientific and technological excellence.

Amendment

The EU has the unique chance of being a global leader and increase its share of world markets, by showcasing how digital transformation, leadership in key enabling and space technologies, the transition to a low-carbon, circular economy and competitiveness ***and a societal understanding of these technologies and evolutions*** can reinforce each other through scientific and technological excellence.

Or. en

Amendment 121

Proposal for a decision

Annex I – part II – point 3 – point 3.1 – paragraph 8

Text proposed by the Commission

To make the digitised, circular, low-carbon and low-emission economy a reality, action is needed at EU level because of the complexity of value chains, the systemic and multi-disciplinary nature of the technologies and their high development costs, and the cross-sectoral nature of the problems to be addressed. The EU must ensure that all industrial players, and society at large, can benefit from advanced and clean technologies and digitisation. Developing technologies alone will not suffice. Industrially-oriented infrastructures, including pilot lines, will help set up EU businesses and in particular SMEs deploy these technologies and improve their innovation performance.

Amendment

To make the digitised, circular, low-carbon and low-emission economy a reality, action is needed at EU level because of the complexity of value chains, the systemic and multi-disciplinary nature of the technologies and their high development costs, and the cross-sectoral nature of the problems to be addressed. The EU must ensure that all industrial players, and society at large, can benefit from advanced and clean technologies and digitisation. Developing technologies alone will not suffice. Industrially-oriented infrastructures, including pilot lines, will help set up EU businesses and in particular SMEs deploy these technologies and improve their innovation performance. ***In this context cultural and creative industries play a major role: CCIs are a driving force for innovation and development of ICT in Europe. They operate in a constantly evolving environment dominated by the development and use of digital information and communications technology on a global scale. Digital technology has brought about opportunities for the creation of different types of artistic work or practices for which that digital technology is also an essential part of the creative process.***

Amendment

Strengthening the interaction between different sectors, industries and systems through creative spill-overs and bringing

allow for a more systemic approach, and a faster and more profound digital and industrial transformation. **It** will ensure that research and innovation in these areas feed into, and contribute to the implementation of, the EU's policies for industry, digitisation, environment, energy and climate, circular economy, raw and advanced materials and space.

together activities on digital, key enabling and space technologies, as well as a sustainable supply of raw materials, will allow for a more systemic approach, and a faster and more profound digital and industrial transformation. ***Here, synergies between engineering and the arts can help creating digital technologies with a human touch of value to society.*** This will ensure that research and innovation in these areas feed into, and contribute to the implementation of, the EU's policies for industry, digitisation, environment, energy and climate, circular economy, raw and advanced materials and space.

Or. en

Amendment 123

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.1 – paragraph 1

Text proposed by the Commission

Manufacturing is a key driver of employment and prosperity in the EU, producing over three quarters of the EU's global exports and providing over a 100 million direct and indirect jobs. The key challenge for EU manufacturing is to remain competitive at a global level with smarter and more customised products of high added value, produced at much lower energy costs. Creative and cultural inputs will be vital to help generate added value.

Amendment

Manufacturing is a key driver of employment and prosperity in the EU, producing over three quarters of the EU's global exports and providing over a 100 million direct and indirect jobs. The key challenge for EU manufacturing is to remain competitive at a global level with smarter and more customised products of high added value, produced at much lower energy costs ***and reduced carbon footprint. In 21st century Europe, with the transition manufacturing processes and traditional value chains.*** Creative and cultural inputs will ***therefore*** be vital to help generate added value.

Or. en

Amendment 124

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.2 – paragraph 1

Text proposed by the Commission

Maintaining and autonomously developing strong design and production capacities in essential digital technologies such as micro- and nano-electronics, photonics, software and systems, and their integration as well as advanced materials for these applications will be essential for a competitive EU.

Amendment

Maintaining and autonomously developing strong design and production capacities **(including manufacturing equipment)** in essential digital technologies such as micro- and nano-electronics, photonics, software and systems, and their integration as well as advanced materials for these applications will be essential for a competitive EU.

Or. en

Justification

Europe has a strong position in the manufacturing of high tech components for digital production. We need to invest in manufacturing equipment to maintain that position and not lose part of the value chain to other continents.

Amendment 125

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.2 – paragraph 2 – indent 9 a (new)

Text proposed by the Commission

Amendment

- ***ICT for Cultural and Creative Industries: develop new tools to create access, exploit and preserve digital content.***

Or. en

Amendment 126

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.3 – paragraph 2 – indent 4

Text proposed by the Commission

Amendment

– An EU innovation ***ecosystem*** of technology infrastructures¹⁶, identified and prioritised in agreement with Member States, which provide services to accelerate

– An EU innovation ***network*** of technology infrastructures¹⁶, identified and prioritised in agreement with Member States, which provide services to accelerate

technological transformation and uptake by EU industry, notably by SMEs; this will cover all key technologies necessary to enable innovations in the field of materials;

technological transformation and uptake by EU industry, notably by SMEs; this will cover all key technologies necessary to enable innovations in the field of materials;

¹⁶ These are public or private facilities that provide resources and services primarily for the European industry to test and validate key enabling technologies and products. Such infrastructures may be single sited, virtual or distributed, and must be registered in a Member State or a third country associated to the Programme.

Or. en

Amendment 127

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.5 – paragraph 1

Text proposed by the Commission

The Internet has become a key enabler of the digital transformation of all sectors of our economy and society. The EU needs to take the lead in driving the next generation Internet towards a human-centric ecosystem in line with our social and ethical values. Investing in technologies and software for the Next Generation Internet will improve EU industrial competitiveness in the global economy. Optimising EU wide take up will require large-scale cooperation across stakeholders.

Amendment

The Internet has become a key enabler of the digital transformation of all sectors of our economy, ***the culture and creative industries in particular***, and society. The EU needs to take the lead in driving the next generation Internet towards a human-centric ecosystem in line with our social and ethical values. Investing in technologies and software for the Next Generation Internet will improve EU industrial competitiveness in the global economy. Optimising EU wide take up will require large-scale cooperation across stakeholders.

Or. en

Amendment 128

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.6 a (new)

3.2.6 a. Quantum Technologies

Quantum Technologies exploit the enormous advancements in our ability to detect and manipulate single quanta (atoms, photons, electrons). This could revolutionize the whole information value chain from software to hardware and from communications to data mining and AI. Europe is home to world leading researchers in this field and there is currently a global race to transfer scientific advances into market-ready applications. This key enabling technology will have a profound cross-sectorial impact, providing European citizens and industry for example with fundamentally more performing computation (leading, amongst other, to more reliable healthcare, improved chemicals and materials, optimized and thus more sustainable use of resources, more efficient engineering), more secure telecommunications, and many other revolutionary applications.

Broad Lines

- Quantum computing and simulation, including hardware development of different architectures and physical platforms, and algorithm and software development;*
- Quantum networks for secure transmission of data and for sharing quantum resources, both ground- and space-based;*
- Quantum sensors, imaging systems and metrology standards, exploiting coherent quantum systems and entanglement;*
- Test beds and user facilities for the above-mentioned technologies.*

Or. en

Amendment 129

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.7 – paragraph 4 – indent 1

Text proposed by the Commission

– Industrial symbiosis with resource flows between plants across sectors and urban communities; processes and materials, to transport, transform, re-use and store resources, combining the valorisation of by-products, waste **and CO₂**;

Amendment

– Industrial symbiosis with resource flows between plants across sectors and urban communities; processes and materials, to transport, transform, re-use and store resources, combining the valorisation of by-products, waste, **CO₂ and hydrogen, when it is environmentally safe and offers substantial climate benefits**;

Or. en

Amendment 130

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.7 – paragraph 4 – indent 3

Text proposed by the Commission

– Products for enhanced life-cycle performance, durability, upgradeability and ease of repair, dismantling and recycling;

Amendment

– **Systematic design of** products for enhanced life-cycle performance, durability, upgradeability and ease of repair, dismantling and recycling;

Or. en

Justification

A systemic approach to take circularity into account at the start of the design of products should be the norm.

Amendment 131

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.7 – paragraph 4 – indent 6 a (new)

Text proposed by the Commission

Amendment

- **New creative business models,**

approaches and services for reuse, extension of lifetime, refurbishment of products.

Or. en

Justification

The development of new business models focused on take-back of resources and products as well as extension of the lifetime is essential for a circular economy. Europe is leading the way in the public transition to a circular economy, but we need to ensure we also lead in the creation of business out of this revolution.

Amendment 132

Proposal for a decision

Annex I – part II – point 3 – point 3.2 – point 3.2.8 – paragraph 2

Text proposed by the Commission

Breakthrough technologies to achieve significant reductions in greenhouse gases and pollutants, *often* combined with *the* technologies for circular industry above, will lead to strong industrial value chains, revolutionise manufacturing capacities and *improve the global competitiveness of industry; and* at the same time make key contributions to our targets for climate action and environmental quality.

Amendment

Large-scale breakthrough technologies to achieve significant reductions in greenhouse gases and pollutants, **which may be** combined with technologies for circular industry above, will lead to strong industrial value chains, revolutionise manufacturing capacities and at the same time make key contributions to our targets for climate action and environmental quality, **while a strong focus has to be put on the global competitiveness of industry.**

Or. en

Or. en

Amendment 138

Proposal for a decision

Annex I – part II – point 4 – point 4.1 – paragraph 2

Text proposed by the Commission

To meet the objectives of the Paris Agreement the EU will need to transition to low-carbon, resource-efficient and resilient economies and societies. This will be based on profound changes in technology and services, to the ways in which businesses and consumers behave, as well as involving new forms of governance. Limiting the increase of global average temperature to well below 2°C, and pursuing efforts to limit the temperature increase to 1.5°C, requires rapid progress in decarbonising the energy system and substantially reducing greenhouse-gas (GHG) emissions from the transport sector¹⁷. It will also need new

Amendment

To meet the objectives of the Paris Agreement the EU will need to transition to low-carbon, resource-efficient and resilient economies and societies. This will be based on profound changes in technology and services, to the ways in which businesses and consumers behave, as well as involving new forms of governance. Limiting the increase of global average temperature to well below 2°C, and pursuing efforts to limit the temperature increase to 1.5°C, requires rapid progress in decarbonising the energy system and substantially reducing greenhouse-gas (GHG) emissions from the

impetus to accelerate the pace of developing next-generation breakthroughs as well as demonstrating and deploying innovative technologies and solutions, using also the opportunities provided by digital and space technologies. This will be pursued through an integrated approach encompassing decarbonisation, resource efficiency, reduction of air pollution, access to raw materials and circular economy.

transport sector¹⁷ .

The European energy systems are undergoing significant change, with the desire to achieve sustainable, affordable and reliable supply of electricity, heat, fuels and other energy products. The energy system transformation takes place through interactions of technology, the infrastructure, and market, policy and regulatory frameworks. There is a need for a systematic approach and systematic innovations in the whole energy sector.

It will also need new impetus to accelerate the pace of developing next-generation breakthroughs as well as demonstrating and deploying innovative technologies and solutions, using also the opportunities provided by digital and space technologies. This will be pursued through an integrated approach encompassing decarbonisation, resource efficiency, reduction of air pollution, access to raw materials and circular economy.

To achieve this, the EU will also foster participatory approaches to research and innovation, including the multi-actor approach and develop knowledge and innovation systems at local, regional, national and European levels. Insights from Social Sciences and Humanities, social innovation with citizens' engagement and trust in innovation will be crucial to encourage new governance, production and consumption patterns.”

¹⁷ Substantial decarbonisation of other sectors is addressed in other areas of the Horizon Europe Global Challenges and Industrial Competitiveness pillar.

¹⁷ Substantial decarbonisation of other sectors is addressed in other areas of the Horizon Europe Global Challenges and Industrial Competitiveness pillar.

Or. en

Amendment 139

Proposal for a decision

Annex I – part II – point 4 – point 4.1 – paragraph 3

Text proposed by the Commission

Progress in these sectors - but also across the spectrum of EU industry including agriculture, buildings, industrial processes and product use, and waste management - will require continued efforts to better understand the mechanisms of climate change and the associated impacts across the economy and society, exploiting synergies with national activities, other EU types of actions and international cooperation.

Amendment

Progress in these sectors - but also across the spectrum of EU industry including agriculture, buildings, industrial processes and product use, and waste management - will require continued efforts to better understand the mechanisms of climate change and the associated impacts across the economy and society, exploiting synergies with national activities, other EU types of actions and international cooperation. ***Particular attention will be put to ensuring sector coupling, ie. of the electricity, heat, industry, gas and transport sector, in all intervention areas, so crucial for a successful energy transition success.***

4.2.2. *Decarbonisation pathways*

Or. en

Amendment 143

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.2 – paragraph 1

Text proposed by the Commission

The EU aims to be world leader in affordable, secure and sustainable energy technologies improving its competitiveness in global value chains and its position in growth markets. Diverse climatic, geographical, environmental and socio-economic conditions in the EU as well as the need to ensure energy security and access to raw materials, dictate a broad portfolio of energy solutions, including of non-technical nature. As regards renewable energy technologies, costs need to decrease further, performance must improve, integration into the energy system must be improved and breakthrough technologies need to be developed. As regards fossil fuels, decarbonising their usage will be essential to meet the climate objectives.

Amendment

The EU aims to be world leader in affordable, secure and sustainable energy technologies improving its competitiveness in global value chains and its position in growth markets. Diverse climatic, geographical, environmental and socio-economic conditions in the EU as well as the need to ensure energy security and access to raw materials, dictate a broad portfolio of energy solutions, including of non-technical nature. As regards renewable energy technologies, costs need to decrease further, performance must improve, integration into the energy system must be improved and breakthrough technologies need to be developed **and implemented**. As regards fossil fuels, **avoiding and** decarbonising their usage will be essential to meet the climate objectives.

Or. en

Amendment 144

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.2 – paragraph 2 – indent 1

Text proposed by the Commission

– Renewable energy technologies and solutions for power generation, heating and cooling, sustainable transport fuels and intermediate carriers, at various scales and development stages, adapted to geographic conditions and markets, both within the EU and worldwide;

Amendment

– Renewable energy technologies and solutions for power generation, **hydrogen production, industrial process**, heating and cooling, sustainable transport fuels and intermediate carriers, at various scales and development stages, adapted to geographic conditions and markets, both within the EU and worldwide;

Or. en

Justification

The massive integration of intermittent renewable energy sources leads to the urgent necessity of balancing power grids with long-term, large-scale energy storage. In both respects, the production of hydrogen via electrolysis, allowing for Power-to-Gas technology, is an important

solution.

Amendment 145

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.2 – paragraph 2 – indent 2

Text proposed by the Commission

- Disruptive renewable energy technologies for new applications and breakthrough solutions;

Amendment

- Disruptive renewable energy technologies for new ***or highly enhanced*** applications and breakthrough solutions;

Or. en

Amendment 146

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.3 – paragraph 1

Text proposed by the Commission

The expected growth of variable electricity production and shift towards more electric heating, cooling and transport dictates the need for new approaches to manage energy grids. Next to decarbonisation, the goal is to ensure energy affordability, security and stability of supply, achieved through investments in innovative network infrastructure technologies and innovative system management. Energy storage in different forms will play a key role in providing services to the grid, also improving and reinforcing network capacities. Exploiting synergies between different networks (e.g. electricity grids, heating and cooling networks, gas networks, transport recharging and refuelling infrastructure, hydrogen, and telecom networks) and actors (e.g. industrial sites, data centres, self-producers) will be crucial for enabling the smart, integrated operation of the relevant infrastructures.

Amendment

The expected growth of variable electricity production and shift towards more electric ***and hydrogen*** heating, cooling and transport dictates the need for new approaches to manage energy grids. Next to decarbonisation, the goal is to ensure energy affordability, security and stability of supply, achieved through investments in innovative network infrastructure technologies and innovative system management. Energy storage in different forms will play a key role in providing services to the grid, also improving and reinforcing network capacities. Exploiting synergies between different networks (e.g. electricity grids, heating and cooling networks, gas networks, transport recharging and refuelling infrastructure, hydrogen, and telecom networks) and actors (e.g. industrial sites, data centres, self-producers) will be crucial for enabling the smart, integrated operation of the relevant infrastructures. ***It is important to***

highlight that fuel cell hydrogen technologies have huge potential to create high skilled jobs and growth in the EU. This process will be accelerated by relevant public-private partnerships to be establish in Horizon Europe.

Or. en

Justification

The ability of hydrogen to access and integrate each sector of the energy system opens up the opportunity for deploying and utilising renewables to a much greater extent. Whereas electricity derived from renewables provides the power sector with a profound decarbonisation pathway, the heat and mobility sectors as well as industry do not yet have decarbonisation pathways of equivalent significance. The versatility of hydrogen enables these sectors to be integrated and to contribute to Europe's energy transition.

Amendment 147

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.3 – paragraph 2 – indent 1

Text proposed by the Commission

- Technologies and tools for electricity networks to integrate renewables and new loads such as electro-mobility and heat pumps;

Amendment

- Technologies and tools for electricity networks to integrate renewables and new loads such as electro-mobility, *electrolysers, fuel cells* and heat pumps;

Or. en

Amendment 148

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.3 – paragraph 2 – indent 4 a (new)

Text proposed by the Commission

Amendment

- *Systemic impact analysis of new energy technologies, like hydrogen as energy storage.*

Or. en

Justification

Particularly hydrogen is expected to play an important role in our more sustainable energy storage solutions, however this requires an enormous amount of energy to be produced which will severely impact the energy needs in our system. We should work on understanding this impact to ensure we do not cancel out one step towards sustainability with another.

Amendment 149

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.3 – paragraph 2 – indent 4 b (new)

Text proposed by the Commission

Amendment

- *Clean solutions that can deliver on system reliability, complementing and going beyond renewables and electrification-based storage;*

Or. en

Amendment 150

Proposal for a decision

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.4 – paragraph 3

Text proposed by the Commission

Amendment

Industries, and especially those that are energy-intensive, could further improve energy efficiency, and favour the integration of renewable energy sources.

deleted

Or. en

Justification

Moved to new intervention area

Amendment 153

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.4 – paragraph 4 – indent 5

Text proposed by the Commission

Amendment

– *Buildings* life-cycle design, construction, operation and dismantling, taking into account circularity and environmental performance, for energy and resource efficiency, climate resilience, and recycling;

– *New modalities, including smart tools and appliance, for* life-cycle design, construction, operation and dismantling *of buildings*, taking into account circularity and environmental performance, for energy and resource efficiency, climate resilience, and recycling;

Or. en

Justification

Low carbon buildings design, material use = Building life-cycle design. In order to effectively implement circular and environmental friendly design, construction, operation and dismantling, we need tools to follow a building throughout its lifetime.

Amendment 154

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.4 a (new)

Text proposed by the Commission

Amendment

4.2.4 a. Industrial Facilities in the Energy Transition

Industries, and especially those that are energy-intensive, could further improve energy efficiency, and favour the integration of renewable energy sources. Industrial facilities' role in the energy system is changing, due to the need to reduce emissions, based on direct or indirect electrification, also a source of materials for production processes (e.g. Hydrogen). Industrial complexes where many different processes take place near to each other can optimise the exchange of flows of energy and other resources (raw materials) between them.

Broad lines

- Conversion technologies for the sustainable utilization of carbon sources to increase resource efficiency and reduce emissions, including hybrid energy systems for the industry and energy sector with a decarbonization potential*
- Tools and infrastructure for process control of production plants to optimise energy flows and materials (e.g. Hydrogen, other products) in interaction with other production plants and the energy system;*
- Flexibility and efficiency of electricity and heat in industrial plants and the energy system;*
- Improved or new processes, design and materials to efficiently use or produce heat, cold, energy storage;*

Or. en

Justification

Content of new intervention area: "Industrial Facilities in Energy Transition"

Amendment 155

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.5 – paragraph 2 – indent 3

Text proposed by the Commission

– Quality of life for the citizens, safe mobility, urban social innovation, cities' circular and regenerative capacity, reduced environmental footprint and pollution;

Amendment

– Quality of life for the citizens, ***including prevention of energy poverty***, safe mobility, urban social innovation, cities' circular and regenerative capacity, reduced environmental footprint and pollution;

Or. en

Justification

Energy poverty is a major challenge for a fair and social Europe. With the major transitions in our energy systems and society, we need to understand the impact of new and changing energy costs on the lives of our citizens.

Amendment 156

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.7 – paragraph 2 – indent 1

Text proposed by the Commission

– Electrification of all transport modes (e.g. batteries, fuel cells, hybridisation, etc.) including new technologies for vehicle/vessel/aircraft powertrains, fast charging/refuelling, energy harvesting and user-friendly and accessible interfaces with the charging infrastructure, ensuring interoperability and seamless services provision; development and deployment of competitive, safe, high-performing and sustainable batteries for

Amendment

– Electrification of all transport modes (e.g. batteries, fuel cells, hybridisation, etc.) including new technologies for vehicle/vessel/aircraft powertrains, fast charging/refuelling, energy harvesting and user-friendly and accessible interfaces with the ***fuelling and*** charging infrastructure, ensuring interoperability and seamless services provision; development and deployment of competitive, safe, high-performing and sustainable batteries for low and zero-

low and zero-emission vehicles;

emission vehicles;

Or. en

Amendment 157

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.7 – paragraph 2 – indent 2

Text proposed by the Commission

– Sustainable new fuels and new smart vehicles/vessels/aircraft for existing and future mobility patterns and supporting infrastructure; technologies and user-based solutions for interoperability and seamless services provision;

Amendment

– Sustainable new fuels, **like green hydrogen** and new smart vehicles/vessels/aircraft for existing and future mobility patterns and supporting infrastructure; technologies and user-based solutions for interoperability and seamless services provision;

Or. en

Justification

This is going to play such a central role in our new arsenal of fuels that it should be mentioned explicitly to ensure it is a substantial part of the efforts.

Amendment 158

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.8 – paragraph 2 – indent 1

Text proposed by the Commission

– Digital network-and traffic management: advanced decision support systems; next generation traffic management (including multi-modal network and traffic management); contributing to seamless, multimodal and interconnected mobility for passengers and freight; use and limitations of big data; use of innovative satellite positioning/navigation (EGNOS/Galileo);

Amendment

– Digital network-and traffic management: advanced decision support systems; next generation traffic management (including multi-modal network and traffic management); contributing to seamless, multimodal and interconnected mobility for passengers and freight; use and limitations of big data; use of innovative satellite positioning/navigation (EGNOS/Galileo) **understanding new behavior related to changing mobility**;

Or. en

Justification

The management of our mobility systems only works when we can predict how they will be used. Therefore it is essential that we have sufficient understanding of the changes in behavior triggered by changing mobility systems.

Amendment 159

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.8 – paragraph 2 – indent 4 a (new)

Text proposed by the Commission

Amendment

- *New or improved services and business models through which the user interacts with the different smart modalities.*

Or. en

Justification

The focus of this Area of Intervention is almost exclusively on the technological side of the transition, but in the end it is about the citizens using the technology and our economies making money of them by creating new markets.

Amendment 160

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.9 – paragraph 1

Text proposed by the Commission

Amendment

Massive, concentrated and decentralised storage solutions (comprising chemical, electrochemical, electrical, mechanical and thermal) for the energy system will increase efficiency, flexibility, technology independence and accessibility as well as the security of supply. Low-emission, decarbonised transport will require a growing share of electrical and/or other alternatively fuelled vehicles, with better-performing and cheaper, recyclable and reusable batteries, as well as local

Massive, concentrated and decentralised storage solutions (comprising chemical, electrochemical, electrical, mechanical and thermal) for the energy system will increase efficiency, flexibility, technology independence and accessibility as well as the security of supply. Low-emission, decarbonised transport will require a growing share of electrical, **hydrogen** and/or other alternatively fuelled vehicles, with better-performing and cheaper, recyclable and reusable batteries, as well as

provision of *synthetic/renewable* fuels such as hydrogen and innovative solutions for on-site storage.

local provision of *low carbon* fuels such as hydrogen and innovative solutions for on-site storage. *The suite of solutions needs to address the fulltime-scale of intermittency, from milliseconds to months.*

Or. en

Justification

Fuel cell vehicles are electric vehicles using hydrogen as fuel to produce electricity onboard. Furthermore, hydrogen is not limited to fuel cell technologies but as a feedstock for energy-intensive industries. Fuel cells are also an efficient energy converter technology that can use hydrogen and/or natural gas as fuel. Hydrogen and fuel cells are complementary technologies but not exclusively linked to each other.

Amendment 161

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.9 – paragraph 2 – indent 1

Text proposed by the Commission

- Technologies including liquid and gaseous *renewable* fuels and their associated value chains, for daily to seasonal energy storage needs;

Amendment

- Technologies including liquid and gaseous *low carbon*, fuels and their associated value chains, for daily to seasonal energy storage needs;

Or. en

Amendment 162

Proposal for a decision

Annex I – part II – point 4 – point 4.2 – point 4.2.9 – paragraph 2 – indent 3

Text proposed by the Commission

- Low zero-carbon hydrogen *including* fuel cells, and the EU value chain from design to end use across various applications.

Amendment

- Low *or* zero-carbon hydrogen, *electrolyzes*, fuel cells, and the EU value chain from design to end use across various applications. *Hydrogen plays a crucial role for the decarbonisation of industries (i.e steel, chemicals)*

Or. en

Amendment 163

Proposal for a decision

Annex I – part II – point 5 – point 5.1 – paragraph 1

Text proposed by the Commission

Human activities are exerting increasing pressure on soils, seas and oceans, water, air, biodiversity and other natural resources. Nourishing the planet's growing population is directly dependent on the health of natural systems and resources. However, combined with climate change, humanity's growing demand for natural resources creates environmental pressures that go far beyond sustainable levels, affecting ecosystems and their capacity to provide services for human well-being. The concepts of the circular economy, the bioeconomy and the blue economy provide an opportunity to balance environmental, social and economic goals and to set human activities on a path to sustainability.

Amendment

Human activities are exerting increasing pressure on soils, seas and oceans, water, air, biodiversity and other natural resources. Nourishing the planet's growing population is directly dependent on the health of natural systems and resources. However, combined with climate change, humanity's growing demand for natural resources creates environmental pressures that go far beyond sustainable levels, affecting ecosystems and their capacity to provide services for human well-being. The concepts of the circular economy, **agroecology**, the bioeconomy and the blue economy provide an opportunity to balance environmental, social and economic goals and to set human activities on a path to sustainability.

Or. en

Amendment 164

Proposal for a decision

Annex I – part II – point 5 – point 5.1 – paragraph 2

Text proposed by the Commission

Meeting the goals of sustainable development, guaranteeing the production and consumption of safe and healthy food, promoting sustainable practices in agriculture, aquaculture, fisheries and forestry, ensuring access to clean water, soil and air for all, cleaning up the seas and oceans, preserving and restoring the planet's vital natural systems and environment requires that we harness the potential of research and innovation. But the pathways for the transition to

Amendment

Meeting the goals of sustainable development, guaranteeing the production and consumption of safe and healthy food, promoting sustainable practices in agriculture, aquaculture, fisheries and forestry, ensuring access to clean water, soil and air for all, cleaning up the seas and oceans, preserving and restoring the planet's vital natural systems and environment requires that we harness the potential of research and innovation. But the pathways for the transition to

sustainability and ways to *overconme* resilient barriers are hardly understood. Making the transition to sustainable consumption and production and restoring planetary health requires investing in technologies, new business models, and social and environmental innovation. This creates new opportunities for a sustainable, resilient, innovative and responsible European economy, boosting resource efficiency, productivity and competitiveness, and generating jobs and growth.

sustainability and ways to *overcome* resilient barriers are hardly understood. Making the transition to sustainable consumption and production and restoring planetary health requires investing in technologies, new business models, and social and environmental innovation. This creates new opportunities for a sustainable, resilient, innovative and responsible European economy, boosting resource efficiency, productivity and competitiveness, and generating jobs and growth.

Or. en

Amendment 165

Proposal for a decision

Annex I – part II – point 5 – point 5.1 – paragraph 3

Text proposed by the Commission

Activities will build a knowledge base and deliver solutions to: sustainably manage and use natural resources from land and sea - and enhance the role of terrestrial and aquatic systems as carbon sinks; ensure food and nutrition security, providing safe, healthy and nutritious diets; accelerate the transition from a fossil-based linear economy to a resource efficient, resilient, low emission, low-carbon circular economy, and supporting the development of a sustainable bio-based economy and the blue economy; and develop resilient and vibrant rural, coastal and urban areas.

Amendment

Activities will build a knowledge base and deliver solutions to: sustainably manage and use natural resources from land and sea - and enhance the role of terrestrial and aquatic systems as carbon sinks; ensure food and nutrition security, providing safe, healthy and nutritious diets; accelerate the transition *of European food and farming towards ecological intensification and agroecological approaches to benefit both conventional and organic agriculture; accelerate the transition* from a fossil-based linear economy to a resource efficient, resilient, low emission, low-carbon circular economy, and supporting the development of a sustainable bio-based economy and the blue economy; and develop resilient and vibrant rural, coastal and urban areas.

Or. en

Amendment 166

Proposal for a decision

Annex I – part II – point 5 – point 5.1 – paragraph 7

Text proposed by the Commission

Research and innovation activities under this Cluster contribute in particular to the implementation of the goals of: the Environmental Action Programme, the Common Agricultural Policy, the Common Fisheries policy, the Food Law legislation, the Maritime policy, the Circular Economy Action Plan, the EU Bioeconomy Strategy, and the 2030 climate and energy framework as well as EU legal provisions to reduce air pollution.

Amendment

Research and innovation activities under this Cluster contribute in particular to the implementation of the goals of: the Environmental Action Programme, the Common Agricultural Policy, the Common Fisheries policy, the Food Law legislation, the Maritime policy, the Circular Economy Action Plan, the EU Bioeconomy Strategy, and the 2030 climate and energy framework as well as EU legal provisions to reduce air pollution. ***Actions will be strongly linked to existing EU partnerships, in particular PRIMA.***

Or. en

Amendment 167

Proposal for a decision

Annex I – part II – point 5 – point 5.2 – point 5.2.1 – paragraph 2 – indent 2

Text proposed by the Commission

– Extension of the Copernicus product and service portfolio;

Amendment

– Extension of the Copernicus product and service portfolio ***in particular services on the attribution of air pollution;***

Or. en

Justification

Due to the electrification and digitalisation of different sectors of our economy, the sources of air pollution will shift dramatically in the coming decade. Without good services that provide constant updates, policy makers will try to tackle the problem based on old knowledge.

Amendment 168

Proposal for a decision

Annex I – part II – point 5 – point 5.2 – point 5.2.3 – paragraph 2 – indent 2 a (new)

Text proposed by the Commission

Amendment

- ***Transition towards integrated and diversified food and farming systems and agronomic practices, including the use of precision technologies, agroecological and ecological intensification approaches to benefit both conventional and organic agriculture;***

Or. en

Amendment 169

Proposal for a decision

Annex I – part II – point 5 – point 5.2 – point 5.2.3 – paragraph 2 – indent 4

Text proposed by the Commission

Amendment

- Plant pests and diseases and animal health and welfare; alternatives to the use of contentious pesticides, antibiotics and other substances;

- Plant pests and diseases and animal health and welfare; alternatives to the use of contentious pesticides, antibiotics and other substances ***development of organic farming strategies to plant and animal health care;***

Or. en

Amendment 170

Proposal for a decision

Annex I – part II – point 5 – point 5.2 – point 5.2.6 – paragraph 1

Text proposed by the Commission

Amendment

Bio-based innovation lays the foundations for the transition away from a fossil-based economy by encompassing the sustainable sourcing, industrial processing and conversion of biomass from land and sea into bio-based materials and products. It also capitalises on the potential of living resources, life sciences and industrial biotechnology for new discoveries, products and processes. Bio-based innovation, including technologies, can

Bio-based innovation lays the foundations for the transition away from a fossil-based economy by encompassing the sustainable sourcing, industrial processing and conversion of biomass from land and sea into bio-based materials and products. It also capitalises on the potential of living resources, life sciences and industrial biotechnology for new discoveries, products and processes. Bio-based innovation, including technologies, can

bring new economic activities and employment to regions and cities, contribute to revitalising rural and coastal economies and strengthen the circularity of the bioeconomy.

bring new economic activities and employment to regions and cities, contribute to revitalising rural and coastal economies and strengthen the circularity of the bioeconomy. ***Bio-based innovation systems require collaboration across the sectors and the value chain.***

Or. en

Amendment 171

Proposal for a decision

Annex I – part II – point 5 – point 5.2 – point 5.2.6 – paragraph 2 – indent 3

Text proposed by the Commission

– Bio-based value chains, materials, including bio-inspired materials, products and processes with novel qualities, functionalities and improved sustainability (including reducing greenhouse gases emissions), fostering the development of advanced biorefineries using a wider range of biomass;

Amendment

– Bio-based value chains, materials, including bio-inspired materials, products and processes with novel qualities, functionalities and improved sustainability (including reducing greenhouse gases emissions), fostering the development of advanced biorefineries using a wider range of biomass ***including bio-waste as well as industrial waste and side-streams;***

Or. en

Justification

Biomass may be perceived as only referring to material from plants and animals. Advanced biorefineries will be able to go beyond, in particular as regards the use of bio-waste as well as industrial waste and side-streams.

Amendment 172

Proposal for a decision

Annex I – part II – point 5 – point 5.2 – point 5.2.6 – paragraph 2 – indent 5

Text proposed by the Commission

– Circularity of the bio-based economy through technological, systemic, social and business model innovation to ***radically*** increase the value generated per

Amendment

– Circularity of the bio-based economy through technological, systemic, social and business model innovation to increase the value generated per unit of

unit of biological resources, keeping the value of such resources in the economy for longer and supporting the principle of the cascading use of sustainable biomass through research and innovation;

biological resources, keeping the value of such resources in the economy for longer and supporting the principle of the cascading use of sustainable biomass through research and innovation;

Or. en

Justification

The word “radically” is not defined.

Amendment 173

Proposal for a decision

Annex I – part II – point 5 – point 5.2 – point 5.2.6 – paragraph 2 – indent 7 a (new)

Text proposed by the Commission

Amendment

- ***Increased understanding on the drivers and barriers for an up-take of bio-based products through research on CE-marking, labelling, application of standards, certification schemes, public procurement and regulatory activities, including from a global competition perspective.***

Or. en

Justification

It will be important for the bio-based sector to have a scientific basis for drivers and barriers to unlock the full potential of this emerging sector, in particular with regards to EU regulation and legislation

Amendment 174

Proposal for a decision

Annex I – part II – point 6 – point 6.2 – point 6.2.2 – paragraph 2 – point 4 – indent 7

Text proposed by the Commission

Amendment

– Analysis of the EU's energy security of supply, including energy

– Analysis of the EU's energy security of supply, including energy infrastructure, and energy markets ***and***

infrastructure, and energy markets;

taking into account the urgency of rapid decarbonisation of the energy systems;

Or. en

Amendment 175

Proposal for a decision

Annex I – part III – paragraph 10 – indent 2 b (new)

Text proposed by the Commission

Amendment

- ***Creating synergies with the activities in other parts of the Programme.***

Or. en

Amendment 185

Proposal for a decision

Annex I – part III – paragraph 11 – indent 2

Text proposed by the Commission

Amendment

- Support to the European Institute of Innovation and Technology (EIT) and Knowledge and Innovation Communities (KICs).

- ***Enhanced*** support to the European Institute of Innovation and Technology (EIT) and Knowledge and Innovation Communities (KICs) - ***the now well-established one-stop shop for innovation in Europe.***

Or. en

Justification

This drafting suggestion reflects the proposed amendments being made to this text.

Amendment 186

Proposal for a decision

Annex I – part III – paragraph 11 a (new)

Text proposed by the Commission

Amendment

The EIT is Europe's largest integrated innovation ecosystem, with over 1,000 excellent partners from business, research and education and beyond. The EIT's innovation model works and remains particularly relevant in removing barriers to innovation at Member State and

regional level.

Or. en

Justification

Description of the EIT's role is missing

Amendment 187

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – paragraph 2

Text proposed by the Commission

The EIC will be implemented primarily through two complementary types of action, namely the Pathfinder for advanced research, for the early stages of technology development, and the Accelerator for innovation and market deployment actions, including the pre-mass commercialisation stages and company growth. With the idea to *offer* a single one-stop shop and a single process of support, the Accelerator will also award blended finance, combining grants with equity investments. It will in addition also channel access to loans provided under the InvestEU programme.

Amendment

The EIC will be implemented primarily through two complementary types of action, namely the *EIC* Pathfinder for advanced research, for the early stages of technology development, and the *EIC* Accelerator for innovation and market deployment actions, including the pre-mass commercialisation stages and company growth. With the idea to *complement the EIT in offering* a single one-stop shop and a single process of support, the Accelerator will also award blended finance, combining grants with equity investments. It will in addition also channel access to loans provided under the InvestEU programme.

Or. en

Justification

the EIT is already a well-established one-stop shop for innovation in Europe. To deliver on expected innovation impact for citizen, all Horizon Europe instruments must interlock and not block. Current duplications between the EIT and EIC need to be settled.

Amendment 188

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – paragraph 3 – indent 1

Text proposed by the Commission

- Focus on breakthrough and disruptive innovations, including social, that have the potential to create new markets, as opposed to those which make incremental improvements in existing products, services or business models;

Amendment

- Focus on **research on radically new future technologies, and** breakthrough and disruptive innovations, including social, that have the potential to create new markets **or enable new solutions**, as opposed to those which make incremental improvements in existing products, services or business models;

Or. en

Justification

The European Innovation Council must encourage the development of research on radically new future technologies which will create innovation. also indirect innovations with high potential should be included in the scope, not just those with visible market potential.

Amendment 189

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – paragraph 3 – indent 2

Text proposed by the Commission

- Be mainly bottom-up, open to innovations from all fields of science, technology and applications in any sector, while also enabling targeted support for emerging breakthrough or disruptive technologies of potential strategic significance;

Amendment

- Be mainly bottom-up, open to **targeted scientific research and** innovations from all fields of science, technology and applications in any sector, **from all types of organisations**, while also enabling targeted support for emerging breakthrough or disruptive technologies of potential strategic significance;

Or. en

Amendment 190

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – paragraph 3 – indent 3

Text proposed by the Commission

- Innovations that cut across different

Amendment

- **Research and** innovations that cut

scientific, technological (e.g. combining physical and digital) fields and sectors will be encouraged;

across different scientific, technological (e.g. combining physical and digital) fields and sectors will be encouraged;

Or. en

Amendment 191

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – paragraph 3 – indent 4

Text proposed by the Commission

– They will be centred on innovators, simplifying procedures and administrative requirements, making use of interviews to help assess applications, and ensuring fast decision making;

Amendment

– They will be centred on **research and** innovators, simplifying procedures and administrative requirements, making use of interviews to help assess applications, and ensuring fast decision making;

Or. en

Justification

Researchers must be included in the text. The Pathfinder instrument will build on the FET scheme and be open to research organisations and collaborative projects aiming to develop cutting-edge research and radically new technologies with promising marketing opportunities.

Amendment 192

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – paragraph 5

Text proposed by the Commission

Particular attention will be paid to ensuring proper and efficient complementarity with individual or networked Member States initiatives, including in the form of European Partnership.

Amendment

In addition, particular attention will be paid to ensuring proper and efficient complementarity with individual or networked Member States initiatives, including in the form of European Partnership.

Or. en

Text proposed by the Commission

Amendment

1.1.2. The Accelerator

1.1.2. The ***EIC*** Accelerator

Or. en

Amendment 198

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – point 1.1.2 – paragraph 2

Text proposed by the Commission

Amendment

Consequently the Accelerator will provide financial support to not yet 'bankable' or investors-attractive innovators and companies that have the ambition to develop and deploy in EU and international markets their breakthrough innovations and to scale up rapidly. For that purpose it will build on the experience from the Phases 2 and 3 of Horizon 2020 SME Instrument and from Horizon 2020 InnovFin, in particular through the addition of non-grant components and the ability to support larger and longer investments.

Consequently the Accelerator will, , ***in full complement with the EIT's support for start-ups and scale-ups***, provide financial support to not yet 'bankable' or investors-attractive innovators and companies that have the ambition to develop and deploy in EU and international markets their breakthrough innovations and to scale up rapidly. For that purpose it will build on the experience from the Phases 2 and 3 of Horizon 2020 SME Instrument and from Horizon 2020 InnovFin, in particular through the addition of non-grant components and the ability to support larger and longer investments.

Or. en

Amendment 199

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – point 1.1.2 – paragraph 7

Text proposed by the Commission

The Accelerator will mainly operate through a continuously open and bottom-up call, targeting individual entrepreneurs (mainly start-ups and SMEs), with a particular attention paid to young and to women innovators. This open and bottom-up call will be complemented by targeted support for on emerging breakthrough or disruptive technologies of potential strategic significance. Proposals may also be submitted by investors, including public innovation agencies, but the support will be awarded to the company.

Amendment

The Accelerator will mainly operate through a continuously open and bottom-up call, targeting individual entrepreneurs (mainly start-ups and SMEs), with a particular attention paid to young and to women innovators. This open and bottom-up call will be complemented by targeted support for on emerging breakthrough or disruptive technologies of potential strategic significance. Proposals may also be submitted by investors, including public innovation agencies, but the support will be awarded to the company. ***Full complementarity with the activities of the Accelerator programmes will be ensured.***

Or. en

Amendment 200

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – point 1.1.2 – paragraph 8

Text proposed by the Commission

The Accelerator will allow for fast-track take-up of innovations stemming from Pathfinder-supported projects from the Pathfinder, from similar Member States 'advanced research programmes' ***and*** from other pillars of the EU Framework Programmes²⁸, in order to support them to reach the market. This identification of projects supported in other pillars of Horizon Europe and also previous Framework Programmes will be based on pertinent methodologies, such as the Innovation Radar.

Amendment

The Accelerator will allow for fast-track take-up of innovations stemming from Pathfinder-supported projects from the Pathfinder, from similar Member States 'advanced research programmes' from ***the EIT and*** other pillars of the EU Framework Programmes²⁸, in order to support them to reach the market. This identification of projects supported in other pillars of Horizon Europe and also previous Framework Programmes will be based on pertinent methodologies, such as the Innovation Radar.

²⁸ Such as ERC Proof of Concept, from projects supported under the 'Global Challenges and Industrial Competitiveness' Pillar, *startups emerging from the KICs of the European Institute of Innovation and Technology, ...* Including from Horizon 2020 activities, particularly project selected under Horizon 2020 SME Phase 2 and related Seal of Excellence financed by Member States, (existing and future) European Partnerships.

²⁸ Such as ERC Proof of Concept, from projects supported under the 'Global Challenges and Industrial Competitiveness' Pillar, Including from Horizon 2020 activities, particularly project selected under Horizon 2020 SME Phase 2 and related Seal of Excellence financed by Member States, (existing and future) European Partnerships.

Or. en

Amendment 201

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – point 1.1.3 – paragraph 1 – indent 1

Text proposed by the Commission

– EIC business acceleration services in support of Pathfinder and Accelerator activities and actions. The aim will be to connect the EIC Community of funded innovators, including funded Seal of Excellence, to investors, partners and public buyers. It will provide a range of coaching and mentoring services to EIC actions. It will provide innovators with access to international networks of potential partners, including industrial ones, to complement a value chain or develop market opportunities, and find investors and other sources of private or corporate finance. Activities will include live events (e.g. brokerage events, pitching sessions) but also, the development of matching platforms or use of existing ones, in close relation with financial intermediaries supported by the InvestEU and with the EIB Group. These activities will also encourage peer exchanges as a source of learning in innovation ecosystem, making particular good use of Members of the High Level Advisory board of the EIC

Amendment

– EIC business acceleration services in support of Pathfinder and Accelerator activities and actions. The aim will be to connect the EIC Community of funded innovators, including funded Seal of Excellence, to investors, partners and public buyers. It will provide a range of coaching and mentoring services to EIC actions. It will provide innovators with access to international networks of potential partners, including industrial ones, to complement a value chain or develop market opportunities, and find investors and other sources of private or corporate finance. Activities will include live events (e.g. brokerage events, pitching sessions) but also, the development of matching platforms or use of existing ones, in close relation with financial intermediaries supported by the InvestEU and with the EIB Group. These activities will also encourage peer exchanges as a source of learning in innovation ecosystem, making particular good use of Members of the High Level Advisory board of the EIC

and EIC Fellows;

and EIC Fellows; ***These additional EIC activities focused on breakthrough/high-risk innovations will complement the similar portfolio of the EIT activities targeting entrepreneurs, innovators and start-ups.***

Or. en

Justification

To deliver on expected innovation impact for the citizen, instruments must interlock and potential synergies maximised in spirit of best value for European taxpayer money.

Amendment 202

Proposal for a decision

Annex I – part III – point 1 – point 1.1 – point 1.1.3 – paragraph 1 – indent 3

Text proposed by the Commission

– EIC Challenges, i.e. inducement prizes, to help develop ***novel solutions to global challenges***, bring in new actors and develop new communities. EIC recognition prizes will include iCapital, the Social Innovation Inducement Prize, and the Women Innovators' Prize.²⁹ The design ***of its prizes will be linked to EIC to*** other parts of the ***Framework*** programme, including missions and ***other funding bodies***. Opportunities for cooperation with organisations (such as enterprises, universities, research organisations, business accelerators, charities and foundations) will be explored.

²⁹ The EIC prizes will take over the management of prizes launched under Horizon 2020 and provide for the design and implementation of new inducement prizes and recognition awards.

Amendment

– EIC Challenges, i.e. inducement prizes, to help develop ***new breakthrough innovations***, bring in new actors and develop new communities. EIC recognition prizes will include iCapital, the Social Innovation Inducement Prize, and the Women Innovators' Prize.²⁹ The design ***and implementation of these prizes will linked with*** other parts of the programme, including missions and ***the EIT to ensure complementarity and avoid duplications***. Opportunities for cooperation with organisations (such as enterprises, universities, research organisations, business accelerators, charities and foundations) will be explored.

²⁹ The EIC prizes will take over the management of prizes ***given by the Commission*** launched under Horizon 2020 and provide for the design and implementation of new inducement prizes and recognition awards.

Or. en

Justification

The EIT Awards is a well-established and prestigious annual practise with similar scope and catagories as is being proposed for the EIC Challenges. In this context, the two organisations should ensure that there are no unnecessary overlaps and duplications.

Amendment 203

Proposal for a decision

Annex I – part III – point 1 – point 1.2 – point 1.2.1 – paragraph 1

Text proposed by the Commission

The High Level Advisory Board of the EIC (EIC Board) will assist the Commission in implementing the EIC. *As well as advising* on the EIC work programmes, the EIC Board will take an active role in advising the management and following up actions. It will have a communication function, with members playing an ambassadorial role helping to stimulate innovation in the EU. Communication channels will include attendance at key innovation events, social media, constitution of an EIC community of innovators, engaging with key media with a focus on innovation, common events with incubators and acceleration hubs.

Amendment

The High Level Advisory Board of the EIC (EIC Board) will assist the Commission in implementing the EIC. ***It will be composed of academic experts on innovation policy, research and technology organisations, entrepreneurs, venture capitalists, among others.***

For the implementation of the EIC, the Commission will, with the support of the EIC Board, provide:

- clear differentiation between the addressed targeted groups and their distinct needs.***
- details on how it will implement the mixed support (grant, equity, loan and guarantee).***
- solid mechanism for systematic and real-time evaluation of the Programme to ensure quick policy learning process and develop iterative innovation patterns, including the selection and implementation of indicators.***

· *structural cooperation between EIC and the EIT to ensure complementarity. The EIC will focus on large-scale/high-risk support to promising innovator, complementing the EIT's support for start-ups and scale-ups.*

· *definition of the role and responsibilities of the programme managers.*

· *definition of the tools to attract risk capital investors in case of highly risky projects.*

· *definition of the innovation objectives in terms of product, process, marketing and services.*

The Board will also advise on the EIC work programmes, the EIC Board will take an active role in advising the management and following up actions. It will have a communication function, with members playing an ambassadorial role helping to stimulate innovation in the EU.

*Communication channels will include attendance at key innovation events, social media, constitution of an EIC community of innovators, engaging with key media with a focus on innovation, common events with incubators and acceleration hubs. **The EIT's Governing Board and EIC Board will cooperate closely to exploit synergies and increased added value to innovators and entrepreneurs in the EU***

Amendment 204

Proposal for a decision

Annex I – part III – point 1 – point 1.2 – point 1.2.1 – paragraph 2

Text proposed by the Commission

The EIC Board will provide recommendations to the Commission regarding innovation trends or initiatives needed to enhance and foster the EU

Amendment

The EIC Board, ***in consultation with the EIT Governing Board***, will provide recommendations to the Commission regarding innovation trends or initiatives

innovation ecosystem, including potential regulatory barriers. The Board's advice should also identify emerging areas of innovation to be taken into account in the activities under the Global Challenges and Industrial Competitiveness pillar and missions. In this way, the Board is expected to contribute to the overall coherence of the Horizon Europe programme.

needed to enhance and foster the EU innovation ecosystem, including potential regulatory barriers. The Board's advice should also identify emerging areas of innovation to be taken into account in the activities under the Global Challenges and Industrial Competitiveness pillar and missions. In this way, the Board is expected to contribute to the overall coherence of the Horizon Europe programme.

Or. en

Amendment 205

Proposal for a decision

Annex I – part III – point 2 – point 2.1 – paragraph 2

Text proposed by the Commission

The EU must also aim to develop ecosystems that support social innovation and public sector innovation, in addition to innovation in private enterprises. Indeed, the government sector must innovate and renew itself in order to be able to support the changes in regulation and governance required to support the large-scale deployment of new technologies and a growing public demand for the more efficient and effective delivery of services. Social innovations are crucial to enhance the welfare of our societies.

Amendment

The EU must also aim to develop ecosystems that support social innovation and public sector innovation, in addition to innovation in private enterprises. Indeed, the government sector must innovate and renew itself in order to be able to support the changes in regulation and governance required to support the large-scale deployment of new technologies and a growing public demand for the more efficient and effective delivery of services. Social innovations are crucial to enhance the welfare of our societies.

As Europe's largest innovation network, the EIT will play an important role in the implementation of this priority. The EIT connects national and regional innovation ecosystems via its Innovation Communities(KICs). They make the case for desired interregional cooperation by linking innovation ecosystems on a pan-European scale.

Or. en

Justification

As Europe's largest innovation network, the EIT is best placed to continue providing support to the "European Innovation Ecosystems".

Amendment 206

Proposal for a decision

Annex I – part III – point 2 – point 2.2 – paragraph 1 – introductory part

Text proposed by the Commission

As a first step the Commission will organise an *EIC* Forum of Member States and Associated countries' public authorities and bodies in charge of national innovation policies and programmes, with the aim of promoting coordination and dialogue on the development of the EU's innovation ecosystem. Within this *EIC* Forum, the Commission will:

Amendment

As a first step the Commission will organise an *Innovation* Forum of Member States and Associated countries' public authorities and bodies in charge of national innovation policies and programmes, with the aim of promoting coordination and dialogue on the development of the EU's innovation ecosystem. Within this *Innovation* Forum, *the involved stakeholders and EU bodies, including the EIT, the EIC Board and* the Commission will:

Amendment 210

Proposal for a decision

Annex I – part III – point 2 – point 2.2 – paragraph 3 – indent 1

Text proposed by the Commission

– Promote and co-fund joint innovation programmes managed by authorities in charge of public national, regional or local innovation policies and programmes, to which private entities supporting innovation and innovators **may** be associated. Such demand-driven joint

Amendment

– Promote and co-fund joint innovation programmes managed by authorities in charge of public national, regional or local innovation policies and programmes, to which private entities supporting innovation and innovators **should** be associated. Such **supply and**

programmes may target, among others, early stage and feasibility study support, **academia-enterprise** cooperation, **support to high-tech SMEs' collaborative research, technology and knowledge transfer**, internationalisation of SMEs, market analysis and development, digitalisation of low-tech SMEs, financial instruments for close to market innovations activities or market deployment, social innovation. They may also include joint public procurement initiatives, enabling innovations to be commercialised in the public sector, in particular in support of the development of new policy. This could be particularly effective to stimulate innovation in public service areas and to provide market opportunities to European innovators.

demand-driven joint programmes may target, among others, early stage and feasibility study support, cooperation **between academia, research organisations and enterprises**, internationalisation of SMEs, market analysis and development, digitalisation of low-tech SMEs, financial instruments for close to market innovations activities or market deployment, social innovation. They may also include joint public procurement initiatives, enabling innovations to be commercialised in the public sector, in particular in support of the development of new policy. **When managed at the local level, these programmes should allow transnational partnerships and should be coherent with the smart specialisation strategies of the involved regions.** This could be particularly effective to stimulate innovation in public service areas and to provide market opportunities to European innovators.

Or. en

Justification

The “European innovation ecosystems” scheme aims to support local, regional and national innovation ecosystems. In order to ensure consistency, critical mass and complementarity, place-based local innovation ecosystems should be encouraged to cooperate at the European level within the framework of their respective Smart specialization strategies, opening the way to synergies with ERDF.

Amendment 211

Proposal for a decision

Annex I – part III – point 3 – point 3.1 – paragraph 4

Text proposed by the Commission

The nature and scale of the innovation challenges require liaising and mobilising players and resources at European scale, by fostering cross-border collaboration. There is a need to break down silos between

Amendment

The nature and scale of the innovation challenges require liaising and mobilising players and resources at European scale, by fostering cross-border collaboration. There is a need to break down silos between

disciplines and along value chains and nurture the establishment of a favorable environment for an effective exchange of knowledge and expertise, and for the development and attraction of entrepreneurial talents.

disciplines and along value chains and nurture the establishment of a favorable environment for an effective exchange of knowledge and expertise, and for the development and attraction of entrepreneurial talents.

The EIT will address these challenges in line with its strategic objectives for the period 2021-2027, to be laid down in the legal proposal for the Strategic Innovation Agenda of the EIT. The future of KICs shall be identified by the EIT Board and the European Commission in consultation with the European Parliament and Member States.

Or. en

Justification

It is necessary to clarify that the objectives of the EIT for the period 2021-2027 will be laid down by its Strategic Innovation Agenda, adopted by the European Parliament and the Council, upon proposal by the Commission. Already four new initiatives have been put forward by the EIT for post 2020 period which should be implemented in the areas of security, cultural and creative industries, migration and water.

Amendment 212

Proposal for a decision

Annex I – part III – point 3 – point 3.2 – point 3.2.1 – paragraph 1

Text proposed by the Commission

The EIT will play a reinforced role in strengthening sustainable innovation ecosystems across Europe. In particular, the EIT will continue to operate primarily through its Knowledge and Innovation Communities (KICs), the large-scale European partnerships that address specific societal challenges. It will continue to strengthen innovation ecosystems around them, by fostering the integration of research, innovation and education. Furthermore, EIT will contribute to bridge existing gaps in innovation performance

Amendment

The EIT will play a reinforced role in strengthening sustainable innovation ecosystems across Europe ***providing solutions to the most pressing global challenges our societies are facing***. In particular, the EIT will continue to operate primarily through its Knowledge and Innovation Communities (KICs), the large-scale European partnerships that address specific societal challenges. It will continue to strengthen innovation ecosystems around them, by fostering the integration of research, innovation and

across Europe by expanding its Regional Innovation Scheme (EIT RIS). The EIT will work with innovation ecosystems that exhibit high innovation potential based on strategy, thematic alignment and impact, in close synergy with Smart Specialisation Strategies and Platforms.

education. Furthermore, EIT will contribute to bridge existing gaps in innovation performance across Europe by expanding its Regional Innovation Scheme (EIT RIS). The EIT will work with innovation ecosystems that exhibit high innovation potential based on strategy, thematic alignment and impact, in close synergy with Smart Specialisation Strategies and Platforms.

Or. en

Justification

As text explains, the EIT is key to implementing innovation ecosystems across Europe tackling the biggest changes facing society.

Amendment 213

Proposal for a decision

Annex I – part III – point 3 – point 3.2 – point 3.2.1 – paragraph 2 – indent 1

Text proposed by the Commission

- Reinforcing the effectiveness of the existing KICs and setting up new ones ***in a limited number of thematic areas***;

Amendment

- Reinforcing the effectiveness of the existing KICs and setting up new ones ***to tackle global challenges***;

Or. en

Justification

The EIT is focused on tackling the biggest changes facing society. The specific objectives of the EIT for the period 2021-2027, as well as the establishment of new KICs, will be defined by means of the Strategic Innovation Agenda of the EIT adopted by the European Parliament and the Council following a proposal by the Commission taking into account the corresponding impact assessment.

Amendment 214

Proposal for a decision

Annex I – part III – point 3 – point 3.2 – point 3.2.2 – paragraph 2 – indent 4 a (new)

Text proposed by the Commission

Amendment

- ***EIT Awards, i.e. the EIT's well-established recognition prizes, to help develop novel solutions to global challenges.***

Or. en

Justification

The EIT Awards are a well-established and highly recognised tool which should be maintained and strengthened while avoiding unnecessary duplications with the proposed EIC Challenges.

Amendment 215

Proposal for a decision

Annex I – part III – point 3 – point 3.2 – point 3.2.3 – introductory part

Text proposed by the Commission

Amendment

3.2.3. New solutions to ***the market***

3.2.3. New solutions to ***address-global challenges***

Or. en

Justification

EIT is not about just any solutions but focussed on solutions that tackle societal challenges

Amendment 216

Proposal for a decision

Annex I – part III – point 3 – point 3.2 – point 3.2.3 – paragraph 2 – indent 1

Amendment

- ***Share and disseminate innovative practices and learnings and contribute to innovation policy in Europe, where appropriate in conjunction and close cooperation with other parts of Horizon Europe.***

Or. en

Amendment 222

Proposal for a decision

Annex I – part 4 – point 1 – introductory part

Text proposed by the Commission

Amendment

1. ***SHARING*** EXCELLENCE³³

1. ***SPREADING*** EXCELLENCE³³

³³ A criterion based on research and innovation excellence will be used to define those Member States and Associated Countries where legal entities need to be established in order to be eligible to submit proposals as coordinators under 'sharing excellence'. This criterion will address the dimensions of the overall economic performance (GDP), research performance and innovation performance in a combined manner normalised to the size of the related countries. The countries identified with this criterion are called 'eligible countries' in the context of 'sharing excellence'. On the basis of Article 349 TFEU, legal entities from Outermost Regions will be also fully eligible as coordinators under 'sharing excellence'.

³³ A criterion based on research and innovation excellence will be used to define those Member States and Associated Countries where legal entities need to be established in order to be eligible to submit proposals as coordinators under 'sharing excellence'. This criterion will address the dimensions of the overall economic performance (GDP), research performance and innovation performance in a combined manner normalised to the size of the related countries. The countries identified with this criterion are called 'eligible countries' in the context of 'sharing excellence'. On the basis of Article 349 TFEU, legal entities from Outermost Regions will be also fully eligible as coordinators under 'sharing excellence'.

Or. en

Amendment 223

Proposal for a decision

Annex I – part 4 – point 1 – paragraph 1

Text proposed by the Commission

Reducing disparities in research and innovation performance by sharing knowledge and expertise across the EU will help countries and regions that are lagging behind in terms of research and innovation performance, including the EU outermost regions, to attain a competitive position in the global value chains. Activities may also be established to foster brain circulation right across ERA and better exploitation of existing (and possibly jointly managed EU programmes) research infrastructures in the targeted countries through mobility of researchers and innovators.

Amendment

Reducing disparities in research and innovation performance by sharing knowledge and expertise across the EU will help countries and regions that are lagging behind in terms of research and innovation performance, including the EU outermost regions, to attain a competitive position in the global value chains. Activities may also be established to foster brain circulation right across ERA and better exploitation of existing (and possibly jointly managed EU programmes) research infrastructures in the targeted countries through mobility *and virtual collaboration* of researchers and innovators.

Or. en

Amendment 224

Proposal for a decision

Annex I – part 4 – point 1 – paragraph 3 – indent 1

Text proposed by the Commission

- Teaming, to create new centres of excellence or upgrade existing ones in eligible countries, building on partnerships between leading scientific institutions and partner institutions;

Amendment

- Teaming, to create new centres of excellence or upgrade existing ones in eligible countries, building on partnerships ***in all stages of research*** between leading scientific institutions and partner institutions; ***Applicants need to clearly show that projects are linked with national and/or regional strategies to be able to apply for funding under this broad line.***

Or. en

Justification

Links between actions under Horizon Europe, national and regional priorities and funds need to be strengthened.

Amendment 225

Proposal for a decision

Annex I – part 4 – point 1 – paragraph 3 – indent 2

Text proposed by the Commission

- Twinning, to significantly strengthen a university or research organisation from an eligible country in a defined field, by linking it with internationally-leading research institutions from other Member States or Associated Countries.

Amendment

- Twinning, to significantly strengthen a university or research organisation from an eligible country in a defined field, ***in all stages of research***, by linking it with internationally-leading research institutions from other Member States or Associated Countries. ***Applicants need to clearly show that projects are linked with national and/or regional strategies to be able to apply for funding under this broad line.***

Or. en

Justification

Links between actions under Horizon Europe, national and regional priorities and funds need to be strengthened.

Amendment 226

Proposal for a decision

Annex I – part 4 – point 1 – paragraph 3 – indent 4 a (new)

Text proposed by the Commission

Amendment

- ***“Excellence initiatives”, to support new ideas aiming to strengthen research and innovation systems in the eligible countries. Actions should complement the other broad lines under this priority, avoiding overlaps, and should be in line with regional and national strategies. Evaluation will be done in cooperation with internationally-leading research institutions from other Member States or Associated Countries. Applicants need to clearly show that projects are linked with national and/or regional strategies to be able to apply for funding under this broad line.***

Or. en

Justification

There is a gap today in widening instruments outside teaming, twinning, ERA chairs and COST. A more open, fully bottom up scheme should be created to open doors for less developed MS to develop an excellent initiative open to all types of stakeholders to strengthen national and regional R&I systems. Calls will be collaborative or mono-beneficiary (for public institutions only). Links between actions under Horizon Europe, national and regional priorities and funds need to be strengthened.

Amendment 227

Proposal for a decision

Annex I – part 4 – point 1 – paragraph 3 – indent 4 b (new)

Text proposed by the Commission

Amendment

- ***Widening fellowships, to enable researchers of any nationality to acquire and transfer new knowledge and to work on research and innovation in widening countries. This scheme will be linked with relevant complementary actions in other parts of the Programme, in particular under Marie Skłodowska Curie.***

Or. en

Justification

Mobility towards 'widening countries' needs to be increased and supported. Widening fellowships could also incentivize researchers who have left a 'widening country' to return and share the experience and expertise they have gained abroad. This is why the initiative already piloted in MSCA should be continued and scaled up in Horizon Europe.

Amendment 228

Proposal for a decision

Annex I – part 4 – point 1 – paragraph 5

Text proposed by the Commission

This intervention area will support the Horizon Europe specific objectives: Spread and connect excellence across the EU; Reinforce the creation of high quality knowledge; Increase cross-sectorial, cross-disciplinary cross-border cooperation.

Amendment

The "Spreading Excellence" priority will support the Horizon Europe specific objectives: Spread and connect excellence across the EU; Reinforce the creation of high quality knowledge; Increase cross-sectorial, cross-disciplinary cross-border cooperation. ***All actions should encourage synergies with other national and EU funds, particularly with ERDF, Cohesion Policy and ESF+, in line with regional research and innovation smart specialisation strategies and operational programmes.***

Or. en

Justification

The "Spreading Excellence" heading should be in line with national and regional strategies

when possible.
